The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better. Excerpt from India Illustrated: With Pen and Pencil To this brief epitome of the races, languages and religions, that from time to time have taken root in India, there remain to be added the settlements of the portu guese and french in the sixteenth century, on the east and west coasts, and the settlements and conquests of britain, consummating in the establishment of her direct rule over one hundred and eighty-six millions of the population, and her pro tectorate over feudatory states numbering fifty-four millions of souls. Side by side with British conquest, christian missions have advanced, at first discountenanced, but afterwards protected and encouraged, carrying the truth as it is in jesus into the cities and villages of the land, unfurling the banner of the Cross amidst the teeming populations, and bringing in its train the civilising and elevating in?uences of education, science and inventions. Britain has done much for India; there still remains much to be done. Forty millions of our fellow subjects go through life on insufficient food. The food supply must be adjusted by equal land laws to the growing population, and Government expenses must be brought down to the level of a just and bearable taxa tion. Two hundred millions are the votaries of a debasing idolatry. Christianity and Education hand in hand must accomplish their work of enlightenment for women as well as for men throughout the land. The order of places in this work follows the route of my journey, beginning with Point de Galle and ending with Bombay. I am indebted to many tourists like myself who have given their impressions to the world for descriptions of scenes which I was unable to visit. For the general subject there are no writers to whom I owe more than to Dr. James fergusson, the great authority on Indian Architecture, and to Dr. W. W. Hunter, India's ablest statistician. Dr. Hunter's writings have been of invaluable service to me; they stand pre-eminent alike for accuracy of detail, and largeness, breadth, and magnanimity of judgment. The valuable Manual of roper lethridge, Esq, has also been helpful to me. With reference to Ceylon, I am specially indebted to J. W. Rhys davids, Esq, the Hibbert Lecturer. I beg further to acknowledge the assistance rendered me by richard garnett, Esq, of the British Museum Library, george loch, Esq, Of the India Civil Service, and Dr. Rost of the India Office. At the suggestion of Sir j. Risdon bennett, M.D., Ihave prefixed this short introduction on Indian Ethnology, Languages, and Religions. This book traces the epic clash of values between traditional scenery-and-tourism management and emerging ecological concepts in the national parks, America's most treasured landscapes. It spans the period from the creation of Yellowstone National Park in 1872 to near the present, analyzing the management of fires, predators, elk, bear, and other natural phenomena in parks such as Yellowstone, Yosemite, Grand Canyon, and Great Smoky Mountains. Based largely on original documents never before researched, this is the most thorough history of the national parks ever written. Focusing on the decades after the National Park Service was established in 1916, the author reveals the dynamics of policy formulation and change, as landscape architects, foresters, wildlife biologists, and other Park Service professionals contended for dominance and shaped the attitudes and culture of the Service. The book provides a fresh look at the national parks and an analysis of why the Service has not responded in full faith to the environmental concerns of recent times. Richard West Sellars, a historian with the National Park Service, has become uniquely familiar with the history, culture, and dynamics of the Service?including its biases, internal alliances and rivalries, self-image, folklore, and rhetoric. The book will prove indispensable for environmental and governmental specialists and for general readers seeking an in-depth analysis of one of America's most admired federal bureaus. "The relationship between artists and their patrons has always been a complex and fascinating one. In the case of the Habsburg rules of the sixteenth and seventh centuries, this is especially true, not only because those rulers are themselves of intrinsic interest, but because the artists whom they encouraged or employed - Durer, Titian, El Greco, Rubens - were among the greatest of all times. In Princes and Artists Professor Trevor-Roper explores the relationship between art and patronage through the careers of the Emperor Charles V (1500-58), his son Philip II of Spain (1527-98), the Emperor Rudolf II (1552-1612) and 'the arch-dukes' - Albert and Isabella - who ruled the southern Netherlands from 1598 to 1633. In the context of their personal lives, their several courts, their political activities, and the ideological conflicts of the era, art played an immensely important role - partly as propaganda, partly for the sheer aesthetic pleasure it gave. The author argues that the distinctive characteristics of patronage in this period, which spanned the transition from the High Renaissance to the Baroque in art, from the Reformation to the Counter-Reformation in ideology, are to be explained by the 'world picture' of the age: "Art symbolised a whole view of life, of which politics were a part, and which the court had a duty to advertise and sustain." -- Book jacket. Vol. for 1955 includes an issue with title Product design handbook issue; 1956, Product design digest issue; 1957, Design digest issue. From the gruesome ogress in Hansel and Gretel to the hags at the sabbath in Faust, the witch has been a powerful figure of the Western imagination. In the sixteenth and seventeenth centuries thousands of women confessed to being witches—of making pacts with the Devil, causing babies to sicken, and killing animals and crops—and were put to death. This book is a gripping account of the pursuit, interrogation, torture, and burning of witches during this period and beyond. Drawing on hundreds of original trial transcripts and other rare sources in four areas of Southern Germany, where most of the witches were executed, Lyndal Roper paints a vivid picture of their lives, families, and tribulations. She also explores the psychology of witch-hunting, explaining why it was mostly older women that were the victims of witch crazes, why they confessed to crimes, and how the depiction of witches in art and literature has influenced the characterization of elderly women in our own culture.
