The Silver Bullet
Feb 19 2022 A
phone call starts a
battle of wits
between the
vampire Amorte
and a dangerous
foe bent on
destroying him and

with little regard
for those who may
get caught in the
game. Carlos (Lone
Wolf) McQuade will
stop at nothing to
get what he wants
and what he wants
is a piece of
Amorte. Family,
friends and
acquaintances
become expendable
pawns in
McQuade's game.
In the end, Amorte
knows he has to put
an end to the
charade before it
puts an end to him.
JC Duarte revisits
one of his favourite
characters, the
vampire Amorte, in
the first short story
in the Life in the
Passing Lane
Series.
*Smart Supply Chain
Finance* Apr 23
2022 This book
focuses on the
connotation and the
basic structure of

smart supply chain
finance and on this
basis,
systematically
explores the
elements of smart
supply chain
finance innovation,
and further
proposes a five-
dimensional model
for the realization
of smart supply
chain finance-
SMART. The book
also explores the
risk management
issues of smart
supply chain
finance from the
perspective of
industrial risk
management.
**Converging
Infrastructures**
Oct 25 2019 This
collection explores
the opportunities
for and possible
implications of
coordination
between two of the
major pieces of
emerging

infrastructure in the United States: Intelligent Transportation Systems (ITS) and the National Information Infrastructure (NII). This collection explores the opportunities for and possible implications of coordination between two of the major pieces of emerging infrastructure in the United States: Intelligent Transportation Systems (ITS) and the National Information Infrastructure (NII). Based on a recent workshop that was sponsored by the U.S. Department of Transportation, MIT, and Harvard, *Converging Infrastructures* frames the

programmatic, organizational, and technical issues involved.

[Innovative Mobile and Internet Services in Ubiquitous Computing](#) Dec 28 2019 This book highlights the latest research findings, methods and techniques, as well as challenges and solutions related to Ubiquitous and Pervasive Computing (UPC). In this regard, it employs both theoretical and practical perspectives, and places special emphasis on innovative, mobile and internet services. With the proliferation of wireless

technologies and electronic devices, there is a rapidly growing interest in Ubiquitous and Pervasive Computing (UPC). UPC makes it possible to create a human-oriented computing environment in which computer chips are embedded in everyday objects and interact with the physical world. Through UPC, people can remain online even while underway, thus enjoying nearly permanent access to their preferred services. Though it has a great potential to revolutionize our lives, UPC also poses a number of new research challenges. *Charity Case* Jun 01 2020 A blueprint

for a national leadership movement to transform the way the public thinks about giving. Virtually everything our society has been taught about charity is backwards. We deny the social sector the ability to grow because of our short-sighted demand that it send every short-term dollar into direct services. Yet if the sector cannot grow, it can never match the scale of our great social problems. In the face of this dilemma, the sector has remained silent, defenseless, and disorganized. In *Charity Case*, Pallotta proposes a visionary solution: a Charity Defense Council to re-

educate the public and give charities the freedom they need to solve our most pressing social issues. Proposes concrete steps for how a national Charity Defense Council will transform the public understanding of the humanitarian sector, including: building an anti-defamation league and legal defense for the sector, creating a massive national ongoing ad campaign to upgrade public literacy about giving, and ultimately enacting a National Civil Rights Act for Charity and Social Enterprise. From Dan Pallotta, renowned builder of social movements and inventor of the

multi-day charity event industry (including the AIDS Rides and Breast Cancer 3-Days) that has cumulatively raised over \$1.1 billion for critical social causes. The hotly-anticipated follow-up to Pallotta's groundbreaking book *Uncharitable*. Grounded in Pallotta's clear vision and deep social sector experience, *Charity Case* is a fascinating wake-up call for fixing the culture that thwarts our charities' ability to change the world. *Proceedings of the International Conference on Information Engineering and Applications (IEA)* 2012 Oct 06 2020 Information

engineering and applications is the field of study concerned with constructing information computing, intelligent systems, mathematical models, numerical solution techniques, and using computers and other electronic devices to analyze and solve natural scientific, social scientific and engineering problems. Information engineering is an important underpinning for techniques used in information and computational science and there are many unresolved problems worth studying. The Proceedings of the 2nd International

Conference on Information Engineering and Applications (IEA 2012), which was held in Chongqing, China, from October 26-28, 2012, discusses the most innovative research and developments including technical challenges and social, legal, political, and economic issues. A forum for engineers and scientists in academia, industry, and government, the Proceedings of the 2nd International Conference on Information Engineering and Applications presents ideas, results, works in progress, and experience in all aspects of information

engineering and applications. *Cross-Cultural Design. Product and Service Design, Mobility and Automotive Design, Cities, Urban Areas, and Intelligent Environments Design* Sep 04 2020 The four-volume set LNCS 13311 - 13314 constitutes the refereed proceedings of the 14th International Conference on Cross-Cultural Design, CCD 2022, which was held as part of HCI International 2022 and took place virtually during June 26 - July 1, 2022. The papers included in the HCII-CCD volume set were organized in topical sections as follows: Part I: Cross-Cultural Interaction Design;

Collaborative and Participatory Cross-Cultural Design; Cross-Cultural Differences and HCI; Aspects of Intercultural Design Part II: Cross-Cultural Learning, Training, and Education; Cross-Cultural Design in Arts and Music; Creative Industries and Cultural Heritage under a Cross-Cultural Perspective; Cross-Cultural Virtual Reality and Games Part III: Intercultural Business Communication; Intercultural Business Communication; HCI and the Global Social Change Imposed by COVID-19; Intercultural Design for Well-being and Inclusiveness Part

IV: Cross-Cultural Product and Service Design; Cross-Cultural Mobility and Automotive UX Design; Design and Culture in Social Development and Digital Transformation of Cities and Urban Areas; Cross-Cultural Design in Intelligent Environments. You and Your Money Aug 16 2021 Essential cultural information about personal finance is the topic of this collection of activities for the young ESL student. **Privacy and Identity Management. Time for a Revolution?** Mar 30 2020 This book contains a range of keynote papers and submitted papers presented at the

10th IFIP WG 9.2, 9.5, 9.6/11.7, 11.4, 11.6/SIG 9.2.2 International Summer School, held in Edinburgh, UK, in August 2015. The 14 revised full papers included in this volume were carefully selected from a total of 43 submissions and were subject to a two-step review process. In addition, the volume contains 4 invited keynote papers. The papers cover a wide range of topics: cloud computing, privacy-enhancing technologies, accountability, measuring privacy and understanding risks, the future of privacy and data protection regulation, the US privacy perspective, privacy and

security, the PRISMS Decision System, engineering privacy, cryptography, surveillance, identity management, the European General Data Protection Regulation framework, communicating privacy issues to the general population, smart technologies, technology users' privacy preferences, sensitive applications, collaboration between humans and machines, and privacy and ethics. [Big Data Analytics for Smart and Connected Cities](#) Apr 11 2021 To continue providing people with safe, comfortable, and

affordable places to live, cities must incorporate techniques and technologies to bring them into the future. The integration of big data and interconnected technology, along with the increasing population, will lead to the necessary creation of smart cities. *Big Data Analytics for Smart and Connected Cities* is a pivotal reference source that provides vital research on the application of the integration of interconnected technologies and big data analytics into the creation of smart cities. While highlighting topics such as energy conservation, public transit planning,

and performance measurement, this publication explores technology integration in urban environments as well as the methods of planning cities to implement these new technologies. This book is ideally designed for engineers, professionals, researchers, and technology developers seeking current research on technology implementation in urban settings. *Owning an Electric Car - 2010 Edition* Jul 15 2021 *Owning an Electric Car* is the essential book for anyone who is interested in owning an electric car and who wants to know more about them. The book has been written with input from

hundreds of people from all around the world: interviews and surveys with owners of electric cars about their experiences - both good and bad, meetings with vehicle manufacturers and discussions with politicians, environmental campaigners and electricity providers have all contributed make this book an essential guide to help you make an informed choice about electric cars.

Mar 23 2022
Travel Fast or Smart? Sep 24 2019 Britain does not have a coherent transport policy, and conventional transport economics has

reached a dead end. A transport policy should incorporate systematic thinking about the travel needs of society, but in Britain public investment in the transport system has been extraordinarily volatile. We closed underused railways and then experienced a doubling of passenger numbers, prompting huge new investment. We gave up making substantial investments in motorways, but we have now chosen to revive the road construction effort in a big way. We vacillate on road pricing, introducing congestion charging successfully in London but backing

off elsewhere because of local opposition. We have delayed the decision about whether and where to build additional airport capacity for decades. This mess has come about because policy has focused on big construction projects and time savings when it should have been focusing on the part that people and places play in economic development. This book sets out the principles that could underpin a strategic policy for transport. Instead of focusing piecemeal on getting from place to place ever faster, we need to think about how and where we want the economy to

develop, and about how new digital technologies can help us achieve what is needed. [Lemon-Aid Used Cars and Trucks 2011-2012](#) Jul 27 2022 As Toyota skids into an ocean of problems and uncertainty continues in the U.S. automotive industry, Lemon-Aid Used Cars and Trucks 20112012 shows buyers how to pick the cheapest and most reliable vehicles from the past 30 years. Lemon-Aid guides are unlike any other car and truck books on the market. Phil Edmonston, Canada's automotive Dr. Phil for 40 years, pulls no punches. Like five books in one, Lemon-Aid Used Cars and Trucks is

an expos of car scams and gas consumption lies; a do-it-yourself service manual; an independent guide that covers beaters, lemons, and collectibles; an archive of secret service bulletins granting free repairs; and a legal primer that even lawyers cant beat! Phil delivers the goods on free fixes for Chrysler, Ford, and GM engine, transmission, brake, and paint defects; lets you know about Corvette and Mustang tops that fly off; gives the lowdown on Honda, Hyundai, and Toyota engines and transmissions; and provides the latest information on computer module glitches.

Intelligent Cyber-Physical Systems Security for Industry 4.0 May 13 2021 Intelligent Cyber-Physical Systems Security for Industry 4.0: Applications, Challenges and Management presents new cyber-physical security findings for Industry 4.0 using emerging technologies like artificial intelligence (with machine/deep learning), data mining, applied mathematics. All these are the essential components for processing data, recognizing patterns, modeling new techniques, and improving the advantages of data science. Features • Presents an

integrated approach with Cyber-Physical Systems, CPS security, and Industry 4.0 in one place • Exposes the necessity of security initiatives, standards, security policies, and procedures in the context of industry 4.0 • Suggests solutions for enhancing the protection of 5G and the Internet of Things (IoT) security • Promotes how optimization or intelligent techniques envisage the role of artificial intelligence-machine/deep learning (AI-ML/DL) in cyberphysical systems security for industry 4.0 This book is primarily aimed at graduates, researchers and

professionals working in the field of security. Executives concerned with security management, knowledge dissemination, information, and policy development for data and network security in different educational, government, and non-government organizations will also find this book useful. *Cyber-Physical Attacks* Dec 20 2021 Cyber-Physical Attacks: A Growing Invisible Threat presents the growing list of harmful uses of computers and their ability to disable cameras, turn off a building's lights, make a car veer off the road, or

a drone land in enemy hands. In essence, it details the ways cyber-physical attacks are replacing physical attacks in crime, warfare, and terrorism. The book explores how attacks using computers affect the physical world in ways that were previously only possible through physical means. Perpetrators can now cause damage without the same risk, and without the political, social, or moral outrage that would follow a more overt physical attack. Readers will learn about all aspects of this brave new world of cyber-physical attacks, along with tactics on how to defend against them. The book

provides an accessible introduction to the variety of cyber-physical attacks that have already been employed or are likely to be employed in the near future. Demonstrates how to identify and protect against cyber-physical threats Written for undergraduate students and non-experts, especially physical security professionals without computer science background Suitable for training police and security professionals Provides a strong understanding of the different ways in which a cyber-attack can affect physical security in a broad range of sectors Includes

online resources for those teaching security management Car Aug 23 2019 *Smart Strategies for Buying a Car* May 25 2022 Most young drivers have one goal in mind when they think of getting their own vehicle: freedom. Car ownership is one of life's joys as well as one of its major financial investments. This candid volume offers readers a step-by-step approach for how to choose the best car to suit their needs and how best to plan, research, and budget for the purchase. In today's economically challenging times, students require an opportunity to learn about money management as

well as car facts, the choices available, and the importance of safety. Content supports state and national standards on financial literacy. **Vehicular Cloud Computing for Traffic Management and Systems** Aug 04 2020 Road accidents caused by impaired and distracted driving as well as traffic congestion are on the rise, with the numbers increasing dramatically every day. Intelligent transportation systems (ITS) aim to improve the efficiency and safety of traveling by consolidating vehicle operations, managing vehicle traffic, and notifying drivers

with alerts and safety messages in real time. Vehicular Cloud Computing for Traffic Management and Systems provides innovative research on the rapidly advancing applications of vehicle-to-vehicle and vehicle-to-infrastructure communication. It also covers the need to fully utilize vehicular ad-hoc network (VANET) resources to provide updated and dynamic information about the conditions of road traffic so that the number of road accidents can be minimized. Featuring research on topics such as identity management, computational architecture, and

resource management, this book is ideally designed for urban planners, researchers, policy makers, graduate-level students, transportation engineers, and technology developers seeking current research on vehicle computational design, architecture, security, and privacy. **Innovating in Practice** Sep 28 2022 The purpose of the book is to devise an alternative conceptual vocabulary for studying innovation by stressing the role of social, contextual and cultural perspectives. This vocabulary is drawn

on a service and on sociological perspectives on innovation based on the ontological assumption that innovation is a value co-creation matter and that it takes place in a reality that is multiple, constructed and socially embedded. The aim is to tackle key issues such as social construction, service innovation, knowledge and learning processes, value (co) creation, innovating and innovation activities networking and collaborative innovation. Auto-Opium Jun 13 2021 This much needed book is the first to provide a comprehensive history of the profession and aesthetics of

American automobile design. The author reveals how the appearance of the automobile was shaped by the social conflicts arising from America's mass production system. He connects the social struggles of American society with the organizational struggles of designers to create symbol-laden substitutes for the American dream. Theoretically sophisticated, lucid and compelling, *Auto-Opium* will appeal to all interested in the American obsession with the car.

The Cat Owner's Manual Aug 28 2022 At Last! A Beginner's Guide to Feline Technology Scratch marks on

your furniture. Dead mice on your doorstep. Stray hairs all over your clothes. It's enough to make you cry out, "Why doesn't my cat have an owner's manual?" And now—finally!—she does. Through step-by-step instructions and helpful schematic diagrams, *The Cat Owner's Manual* explores hundreds of frequently asked questions: Which breeds interface best with dogs? How can I maintain a quality exterior finish? And why does my model always drink from the bathtub? Whatever your concerns, you'll find the answers here—courtesy of celebrated veterinarian Dr.

David Brunner and acclaimed author Sam Stall.

Together, they provide plenty of useful advice for both new and experienced cat owners.

Business Transformation Essentials Sep 16 2021

Transformation programs are a common feature of global companies carrying out major strategic change projects. These programs combine business and technical expertise to bring together management and information systems. Managers rate firms' transformation competencies relatively poorly, and the success rate of such endeavours is

correspondingly low. Using a variety of case studies including: Allianz SE, Shell, SAP, Vodafone, and Mercedes-Benz, this book provides unprecedented insights into characteristics of current transformation programs and the potential that can be leveraged by applying a holistic transformation management approach.

The Little Book of Smart Jan 01 2023
The brainchild of Mercedes-Benz and watch manufacturer Swatch, Smart cars have become a familiar and distinctive sight in many European cities. This book guides the reader through the history

of the brand, recalling its highs and lows and looking at its current model lineup.

Smart Technology Trends in Industrial and Business

Nov 26 2019 This book presents current developments in smart city research and application regarding the management of manufacturing systems, Industry 4.0, transportation, and business management. It suggests approaches to incorporating smart city innovations into manufacturing systems, with an eye towards competitiveness in a global environment. The same pro-innovative

approach is then applied to business and cooperation management. The authors also present smart city transportation solutions including vehicle data processing/reporting system, mobile application for fleet managers, bus drivers, bus passengers and special applications for smart city buses like passenger counting system, IP cameras, GPS system etc. The goal of the book is to establish channels of communication and disseminate knowledge among researchers and professionals working on smart city research and application. Features contributions on a

variety of topics related to smart cities from global researchers and professionals in a wide range of sectors; Presents topics relating to smart cities such as manufacturing, business, and transportation; Includes expanded selected papers from EAI International Conference on Management of Manufacturing Systems (MMS 2016), EAI Industry of Things and Future Technologies Conference - Mobility IoT 2016 and International Conference on Smart Electric Vehicles and Vehicular Ad-hoc NETworks (SEVNET).
Innovative

Computing and Information Jan 21 2022 This six-volume-set (CCIS 231, 232, 233, 234, 235, 236) constitutes the refereed proceedings of the International Conference on Computing, Information and Control, ICCIC 2011, held in Wuhan, China, in September 2011. The papers are organized in two volumes on Innovative Computing and Information (CCIS 231 and 232), two volumes on Computing and Intelligent Systems (CCIS 233 and 234), and in two volumes on Information and Management Engineering (CCIS 235 and 236).

Green, Smart and Connected Transportation Systems Dec 08 2020 These proceedings gather selected papers from the 9th International Conference on Green Intelligent Transportation Systems and Safety, held in Guilin, China on July 1-3, 2018. They feature cutting-edge studies on Green Intelligent Mobility Systems, the guiding motto being to achieve “green, intelligent, and safe transportation systems.” The contributions presented here can help promote the development of green mobility and intelligent transportation technologies to improve

interconnectivity, resource sharing, flexibility and efficiency. Given its scope, the book will benefit researchers and engineers in the fields of Transportation Technology and Traffic Engineering, Automotive and Mechanical Engineering, Industrial and System Engineering, and Electrical Engineering alike. Trends and Applications in Information Systems and Technologies Jul 03 2020 This book is composed of a selection of articles from The 2021 World Conference on Information Systems and Technologies (WorldCIST'21), held online between

30 and 31 of March and 1 and 2 of April 2021 at Hangra de Heroismo, Terceira Island, Azores, Portugal. WorldCIST is a global forum for researchers and practitioners to present and discuss recent results and innovations, current trends, professional experiences and challenges of modern information systems and technologies research, together with their technological development and applications. The main topics covered are: A) Information and Knowledge Management; B) Organizational Models and Information Systems; C) Software and Systems Modeling;

D) Software Systems, Architectures, Applications and Tools; E) Multimedia Systems and Applications; F) Computer Networks, Mobility and Pervasive Systems; G) Intelligent and Decision Support Systems; H) Big Data Analytics and Applications; I) Human-Computer Interaction; J) Ethics, Computers & Security; K) Health Informatics; L) Information Technologies in Education; M) Information Technologies in Radiocommunications; N) Technologies for Biomedical Applications. **Smart Grid and Internet of Things** May 01 2020 This

book constitutes the refereed proceedings of the 5th EAI International Conference on Smart Grid and Internet of Things, SGIoT 2021, held in TaiChung, Taiwan, in December 2021. The 9 regular papers and 4 short papers presented were carefully reviewed and selected from 57 submissions. The papers cover a broad range of topics in wireless sensor, vehicular ad hoc networks, security, deep learning and big data. The papers are organized in two subject areas: applications on internet of things, and communication security, big data, neural networks and machine

learning.

The Electric Car Guide - Mitsubishi I-Miev the Electric Car Guide - Mitsubishi I-Miev

Nov 18 2021 What is it really like to own and use an electric car? Are they slow and dull, or are they fun and exciting to drive? What about practicality and range? This book describes both the highs and lows of electric car ownership, turns a spotlight on the environmental claims and shows how an electric car can become a convenient and easy to use option.

Smart Thinking
Oct 18 2021 The story of smart is an epic tale of genius, inspiration, hope, disappointment,

disaster and ultimate triumph. Funky, stylish and fun, smart is the youngest and most exciting brand of car on the market - and it has revolutionised the way we think about cars and the way we use them. It has put much-needed fun back into driving, and even city motorists smile when they're at the wheel of a smart. But it nearly didn't happen at all. The revolutionary design was the product of the genius who invented the Swatch watch, saving the near-bankrupt Swiss watch industry in the process. But these visionary ideas proved too radical and the tiny two-seater almost

died at birth when a succession of backers lost their nerve. The sensational story of smart traces the decade-long history of this ambitious project, talking to key figures from every stage of the programme and building a vivid picture of an idea ahead of its time.- Inside information from within VW, never before published- The real reasons VW Group dropped the program and DaimlerChrysler picked it up- Secret approaches to other carmakers- What happened? The guiding light of the project speaks out for the first time- Full and frank interviews with today's leading authorities- Smart

design - today, tomorrow and in 2010- Not so much a car, more a way of thinking: what the brand experts thinkAbout the AuthorTony Lewin has spent most of his working life driving cars, analyzing them and reporting on the ups and downs of the global enterprises that build them. As a business writer and editor of Financial Times Automotive World he has kept a constant watch on the world's top carmakers for many years. Today, Lewin divides his time between business journalism and books. In 2003 he published the widely-acclaimed How to Design Cars Like a Pro. **Smart-Tech**

Society Jan 09 2021 Informed by the latest theoretical developments in studies of the social impacts of digital technology, Smart-Tech Society provides an empirically grounded and conceptually informed analysis of the impacts and paradoxes of smart-technology. Positive psychology of driving Smart Oct 30 2022 This book is going to tell you about practical experience of buying and exploitation of the car Smart. The author concentrates on the points of psychological perception and features of driving a micro car Smart ForTwo. The book will be useful for all

owners and fans of the car named Smart and all other micro cars.

Corporate Mobility

Breakthrough

2020 Jan 27 2020

The world of mobility is undergoing a vast transformation. This book highlights the changes inherent in the mobility revolution, and how corporate and commercial users are playing a key role in supporting a breakthrough by 2020.

Smart Products, Smarter Services

Feb 07 2021 We are surrounded by products that have minds of their own. Computing power, in the form of microcontrollers, microprocessors, sensors, and data

storage chips, has become so cheap that manufacturers are building connectivity and embedded intelligence into all types of consumer goods. These 'smart products' are fundamentally changing both the competitive landscape for business and the daily lives of consumers. This book analyzes the evolution of smart products to help managers understand the impact of embedded product intelligence on corporate strategy, consumer value, and industry competition. It describes four different ecosystem strategies for designing and launching smart

products: the control-focused Hegemon, the standards-focused Federator, the high growth and brand-focused Charismatic Leader, and the disruptive industry Transformer. This ecosystem model is then applied to smart products in the automotive, wireless, energy, residential, and health industries. The book concludes with recommendations for successfully managing smart products and services.

Intelligent Sustainable Systems

Nov 06 2020 This book provides insights of World Conference on Smart Trends in Systems, Security and Sustainability

(WS4 2022) which is divided into different sections such as Smart IT Infrastructure for Sustainable Society; Smart Management Prospective for Sustainable Society; Smart Secure Systems for Next Generation Technologies; Smart Trends for Computational Graphics and Image Modeling; and Smart Trends for Biomedical and Health Informatics. The proceedings is presented in two volumes. The book is helpful for active researchers and practitioners in the field.

Blockchain for Smart Cities Jun 25 2022 Focusing on different tools, platforms, and techniques,

Blockchain and the Smart City: Infrastructure and Implementation uses case studies from around the world to examine blockchain deployment in diverse smart city applications. The book begins by examining the fundamental theories and concepts of blockchain. It looks at key smart cities' domains such as banking, insurance, healthcare, and supply chain management. It examines Using case studies for each domain, the book looks at payment mechanisms, fog/edge computing, green computing, and algorithms and consensus

mechanisms for smart cities implementation. It looks at tools such as Hyperledger, Ethereum, Corda, IBM Blockchain, Hydrachain, as well as policies and regulatory standards, applications, solutions, and methodologies. While exploring future blockchain ecosystems for smart and sustainable city life, the book concludes with the research challenges and opportunities academics, researchers, and companies in implementing blockchain applications. Independently organized chapters for greater readability, adaptability, and

flexibility Examines numerous issues from multiple perspectives and academic and industry experts Explores both advances and challenges of cutting-edge technologies

Coverage of security, trust, and privacy issues in smart cities
Smart Car Nov 30 2022 Is the Smart Car really smart for the environment? What technology makes such a small car safe to drive?

Does it use an engine like a regular car? Find out the answers to these questions-and more-in Smart Car! Book jacket.

Road & Rec Mar 11 2021
