This volume consists of papers presented at the Fifth International Workshop on Computer Aided Scheduling of Public Transport, which was held in Montreal from August 19th to the 23rd, 1990. Since the first Workshop in Chicago in 1975 the field had matured considerably. In 1975, there were no presentations that described systems which had been implemented and used on a regular basis. By 1980, in Leeds, and certainly by 1983, in Montreal, several systems were in regular use. They were based on both heuristics and mathematical programming techniques. In 1990, there were more than one hundred transit companies using computer-aided scheduling tools in their regular operations. The scope of the Workshop was broadened in 1987, in Hamburg, so that topics related to scheduling may be introduced. We find, for example, in this book several papers on the technology related to the collection of data and/or the data bases required for scheduling and planning activities. This book constitutes the refereed proceedings of the First Conference on Cybersecurity of Industrial Control Systems, CyberICS 2015, and the First Workshop on the Security of Cyber Physical Systems, WOS-CPS 2015, held in Vienna, Austria, in September 2015 in conjunction with ESORICS 2015, the 20th annual European Symposium on Research in Computer Security. The 6 revised full papers and 2 short papers of CyberICS 2015 presented together with 3 revised full papers of WOS-CPS 2015 were carefully reviewed and selected from 28 initial submissions. CyberICS 2015 focuses on topics covering ICSs, including cyber protection and cyber defense of SCADA systems, plant control systems, engineering workstations, substation equipment, programmable logic controllers, PLCs, and other industrial control system. WOS-CPS 2015 deals with the Security of Cyber Physical Systems, that exist everywhere around us, and range in size, complexity and criticality, from embedded systems used in smart vehicles, to SCADA systems in smart grids to control systems in water distribution systems, to smart transportation systems etc. Ideal for scrapbookers, serious and casual photographers, and budding graphic artists alike, Photoshop Elements 8 is more powerful and easier to use than previous versions. Se trataba de un intento de difundir la disciplina como parte integradora de la metodología criminalística, con tecnología y técnicas informáticas y en el marco legal de nuestro país. Como soporte al precitado curso, se instrumentó el primer Grupo de Expertos en Informática Forense, hoy con más de 1250 miembros en América Latina y España. El resultado de aquella tarea fue la elaboración de dos manuales, también publicados por la Editorial Errepar: el Manual de Informática Forense,

donde se sentaron las bases teóricas de la disciplina adaptada a nuestra realidad judicial, y luego el Manual de Informática Forense II, con la pretensión de extender la disciplina hacia la computación móvil (eran las postrimerías del año 2012). Hoy la tecnología nos ha pasado por el costado; el Derecho como siempre corre desde atrás y desde muy lejos. Los intentos que realiza por reducir la distancia parecen fuegos fatuos (la problemática para instaurar el sistema de notificaciones electrónicas por parte de la CSJN es prueba cabal de ello). Sin embargo, los operadores del Derecho y los auxiliares del juez no pueden darse el lujo de perder el tren tecnológico, so pena de incrementar la inseguridad jurídica que nos afecta a todos. Por esa razón, creemos que la única forma de evitar la brecha es la capacitación permanente de todos los involucrados y la difusión amplia e indiscriminada del conocimiento que cada día se amplía, evoluciona, cambia y se perfecciona. La primera parte de esta nueva obra pretende acercar a los operadores del Derecho una herramienta sencilla y útil para realizar una gestión eficiente, efectiva y eficaz de la prueba documental informática, aproximando las tres disciplinas involucradas (Criminalística, Informática y Derecho), mediante un lenguaje comprensible para los destinatarios. La segunda parte está especialmente orientada a los peritos, expertos y otros auxiliares del juez, brindando una serie de ejercicios prácticos (resueltos) que facilitan la capacitación de los profesionales jóvenes que se aproximan a la disciplina y unifican la metodología de resolución pericial para los más avezados (no existen peritos de la "vieja escuela", simplemente porque no existe una "vieja escuela", ya que la Informática forense en nuestro país aún no ha cumplido las dos décadas). La Prof. Mg. María Elena Darahuge y el Prof. Esp. Luis Enrique Arellano González han intentado por este medio complementar las dos obras antes citadas y brindar continuidad al proceso de formación permanente que la Informática forense estimula en sus cultores, la tecnología impulsa, el Derecho espera con premura y la ciudadanía exige con impaciencia.
