The Power of Servant-leadership Apr 13 2021 The author of "Servant Leadership" offers nine powerful essays designed to stimulate and inspire people in the practice of a more caring leadership. *Growing Weeders Into Leaders* Sep 18 2021 One of America's most accomplished landscaping professionals reveals his methods for cultivating greatness. Nowadays, greatness tends to be measured by shortest or longest times, highest heights, medals won, honors given. But as Aristotle taught us, greatness is what we can do every day, without recognition or reward, for the satisfaction that comes from meeting the challenge, creating a team, and overcoming the odds. Under Jeff McManus's leadership as Director of Landscape Services, the Ole Miss campus has won professional awards—and been cited by Newsweek and Princeton Review as America's "most beautiful campus." In *Growing Weeders into Leaders*, he relates the principles behind his team's success. It is an entertaining and thoughtful look into the hearts and the workday lives of ordinary people who tapped into their inner greatness in pursuit of a vision. Creating one of America's most beautiful college campuses at the University of Mississippi did not happen overnight and, inside these pages, McManus describes the joys, the defeats, the brilliant problem-solving and the best laid plans that are proven worthless . . . until the bigger picture appears. This is the bigger picture as viewed from the ground level—taking you through the practical applications of empowering people to experience not only what it means to grow outstanding landscapes, but also to grow greatness in themselves and encourage it in others. "A straightforward approach to problem-solving and methods to grow individuals into a team." —Susanne Woodell, CGM Historic Gardens Manager, Biltmore

Good to Great Nov 01 2022 *The Challenge Built to Last*, the defining management study of the nineties, showed how great companies triumph over time and how long-term sustained performance can be engineered into the DNA of an enterprise from the very beginning. But what about the company that is not born with great DNA? How can good companies, mediocre companies, even bad companies achieve enduring greatness? The Study For years, this question preyed on the mind of Jim Collins. Are there companies that defy gravity and convert long-term mediocrity or worse into long-term superiority? And if so, what are the universal distinguishing characteristics that cause a company to go from good to great? *The Standards* Using tough

benchmarks, Collins and his research team identified a set of elite companies that made the leap to great results and sustained those results for at least fifteen years. How great? After the leap, the good-to-great companies generated cumulative stock returns that beat the general stock market by an average of seven times in fifteen years, better than twice the results delivered by a composite index of the world's greatest companies, including Coca-Cola, Intel, General Electric, and Merck. The Comparisons The research team contrasted the good-to-great companies with a carefully selected set of comparison companies that failed to make the leap from good to great. What was different? Why did one set of companies become truly great performers while the other set remained only good? Over five years, the team analyzed the histories of all twenty-eight companies in the study. After sifting through mountains of data and thousands of pages of interviews, Collins and his crew discovered the key determinants of greatness -- why some companies make the leap and others don't. The Findings The findings of the Good to Great study will surprise many readers and shed light on virtually every area of management strategy and practice. The findings include: Level 5 Leaders: The research team was shocked to discover the type of leadership required to achieve greatness. The Hedgehog Concept (Simplicity within the Three Circles): To go from good to great requires transcending the curse of competence. A Culture of Discipline: When you combine a culture of discipline with an ethic of entrepreneurship, you get the magical alchemy of great results. Technology Accelerators: Good-to-great companies think differently about the role of technology. The Flywheel and the Doom Loop: Those who launch radical change programs and wrenching restructurings will almost certainly fail to make the leap. "Some of the key concepts discerned in the study," comments Jim Collins, "fly in the face of our modern business culture and will, quite frankly, upset some people." Perhaps, but who can afford to ignore these findings?

What Makes a Leader? (Harvard Business Review Classics) Nov 08 2020 When asked to define the ideal leader, many would emphasize traits such as intelligence, toughness, determination, and vision—the qualities traditionally associated with leadership. Often left off the list are softer, more personal qualities—but they are also essential. Although a certain degree of analytical and technical skill is a minimum requirement for success, studies indicate that emotional intelligence may be the key attribute that distinguishes outstanding performers from those who are merely adequate. Psychologist and author Daniel Goleman first brought the term "emotional intelligence" to a wide audience with his 1995 book of the same name, and Goleman first applied the concept to business with a 1998 classic Harvard Business Review article. In his research at nearly 200 large, global companies, Goleman found that truly effective leaders are distinguished by a high degree of emotional intelligence. Without it, a person can have first-class training, an incisive mind, and an endless supply of good ideas, but he or she still won't be a great leader. The chief components of emotional intelligence—self-awareness, self-regulation, motivation, empathy, and social skill—can sound unbusinesslike, but Goleman found direct ties between emotional intelligence and measurable business results. The Harvard Business Review Classics series offers you the opportunity to make seminal Harvard Business Review articles a part of your permanent management library. Each highly readable volume contains a groundbreaking idea that continues to shape best practices and inspire countless managers around the world—and will have a direct impact on you today and for years to come.

Becoming a Level Five Multiplying Church Sep 26 2019 Becoming a Level Five Multiplying Church continues a conversation started in the Exponential book Spark: Igniting a Culture of Multiplication, drilling down into more detail focusing on how we can each play our part in moving the needle on church multiplication. While Spark introduced these three core elements of culture, in this book Todd and Dave press more deeply into how we live them out. In this expanded version, Alan Hirsch also provides an additional chapter and comments throughout the book. Focusing on the specifics of helping churches identify where they are on the multiplication scale (Levels 1 - 5) and what's needed to become a Level 5 multiplying church, Todd and Dave champion multiplication and equip future church multipliers to move beyond the prevailing addition-growth scorecards. The bottom line, the authors say, is that we need to rethink the operating system that's producing growth but not producing multiplication--and aim for more healthy Kingdom growth that's focused on multiplication.

Built to Last Jan 23 2022 Drawing upon a six-year research project at the Stanford University Graduate School of Business, James C. Collins and Jerry I. Porras took eighteen truly exceptional and long-lasting companies and studied each in direct comparison to one of its top competitors. They examined the companies from their very beginnings to the present day -- as start-ups, as midsize companies, and as large corporations. Throughout, the authors asked: "What makes the truly exceptional companies different from the comparison companies and what were the common practices these enduringly great companies followed throughout their history?" Filled with hundreds of specific examples and organized into a coherent framework of practical concepts that can be applied by managers and entrepreneurs at all levels, Built to Last provides a master blueprint for building organizations that will prosper long into the 21st century and beyond.

Rather, effective leaders know how to connect these leadership attributes with results. *Results-Based Leadership* shows executives how to deliver results in four specific areas: results for employees, for the organization, for its customers, and for its investors. The authors provide action-oriented guidelines that readers can follow to develop and hone their own results-based leadership skills. By shifting our focus to the connection between the attributes and the results of leadership, this perceptive new guide fundamentally improves our understanding of effective leadership. *Results-Based Leadership* brings a refreshing clarity and directness to the leadership discussion, providing a hands-on program to help executives succeed with their leadership challenges.

Turning the Flywheel Dec 10 2020 A companion guidebook to the number-one bestselling *Good to Great*, focused on implementation of the flywheel concept, one of Jim Collins' most memorable ideas that has been used across industries and the social sectors, and with startups. The key to business success is not a single innovation or one plan. It is the act of turning the flywheel, slowly gaining momentum and eventually reaching a breakthrough. Building upon the flywheel concept introduced in his groundbreaking classic *Good to Great*, Jim Collins teaches readers how to create their own flywheel, how to accelerate the flywheel's momentum, and how to stay on the flywheel in shifting markets and during times of turbulence. Combining research from his *Good to Great* labs and case studies from organizations like Amazon, Vanguard, and the Cleveland Clinic which have turned their flywheels with outstanding results, Collins demonstrates that successful organizations can disrupt the world around them—and reach unprecedented success—by employing the flywheel concept.

Drawdown Feb 09 2021 • New York Times bestseller • The 100 most substantive solutions to reverse global warming, based on meticulous research by leading scientists and policymakers around the world “At this point in time, the Drawdown book is exactly what is needed; a credible, conservative solution-by-solution narrative that we can do it. Reading it is an effective inoculation against the widespread perception of doom that humanity cannot and will not solve the climate crisis. Reported by-effects include increased determination and a sense of grounded hope.” —Per Espen Stoknes, Author, *What We Think About When We Try Not To Think About Global Warming* “There’s been no real way for ordinary people to get an understanding of what they can do and what impact it can have. There remains no single, comprehensive, reliable compendium of carbon-reduction solutions across sectors. At least until now. . . . The public is hungry for this kind of practical wisdom.” —David Roberts, *Vox* “This is the ideal environmental sciences textbook—only it is too interesting and inspiring to be called a textbook.” —Peter Kareiva, Director of the Institute of the Environment and Sustainability, UCLA In the face of widespread fear and apathy, an international coalition of researchers, professionals, and scientists have come together to offer a set of realistic and bold solutions to climate change. One hundred techniques and practices are described here—some are well known; some you may have never heard of. They range from clean energy to educating girls in lower-income countries to land use practices that pull carbon out of the air. The solutions exist, are economically viable, and communities throughout the world are currently enacting them with skill and determination. If deployed collectively on a global scale over the next thirty years, they represent a credible path forward, not just to slow the earth’s warming but to reach drawdown, that point in time when greenhouse gases in the atmosphere peak and begin to decline. These measures promise cascading benefits to human health, security, prosperity, and well-being—giving us every reason to see this planetary crisis as an opportunity to create a just and livable world.

The Leader in Me Oct 20 2021 Children in today's world are inundated with information about who to be, what to do and how to live. But what if there was a way to teach children how to manage priorities, focus on goals and be a positive influence on the world around them? The Leader in Me is that programme. It's based on a hugely successful initiative carried out at the A.B. Combs Elementary School in North Carolina. To hear the parents of A. B Combs talk about the school is to be amazed. In 1999, the school debuted a programme that taught The 7 Habits of Highly Effective People to a pilot group of students. The parents reported an incredible change in their children, who blossomed under the programme. By the end of the following year the average end-of-grade scores had leapt from 84 to 94. This book will launch the message onto a much larger platform. Stephen R. Covey takes the 7 Habits, that have already changed the lives of millions of people, and shows how children can use them as they develop. Those habits -- be proactive, begin with the end in mind, put first things first, think win-win, seek to understand and then to be understood, synergize, and sharpen the saw -- are critical skills to learn at a young age and bring incredible results, proving that it's never too early to teach someone how to live well.

Love + Work Dec 30 2019 Love has been driven out of our workplaces. How do we get it back in? We're in the middle of an epidemic of stress and anxiety. A global pandemic has wreaked havoc on our lives. Average life expectancy in the United States is down. At work, less than 16 percent of us are fully engaged. In many high-stress jobs, such as distribution centers, emergency room nursing, and teaching, incidences of PTSD are higher than for soldiers returning from war zones. We're getting something terribly wrong. We've designed the love out of our workplaces, and our schools too, so that they fail utterly to provide for or capitalize on one of our most basic human needs: our need for love. As Marcus Buckingham shows in this eye-opening, uplifting book, love is an energy, and like all forms of energy, it must flow. It demands expression—and that expression is "work." Whether in our professional accomplishments, our relationships, or our response to all the many slings and arrows of life, we know that none of this work will be our best unless it is made with love. There's no learning without love, no innovation, no service, no sustainable growth. Love and work are inextricable. Buckingham first starkly highlights the contours of our loveless work lives and explains how we got here. Next, he relates how we all develop best in response to other human beings. What does a great work relationship look like when the other person is tuned to your loves? What does a great team look like when each member is primed to be a mirror, an amplifier, of the loves of another? Finally, he shows how you can weave love back into the world of work as a force for good, how you can use your daily life routines to pinpoint your specific loves, and how you can make this a discipline for the rest of your life. Today, too often, love comes last at work, and we are living the painful consequences of this. *Love + Work* powerfully shows why love must come first—and how we can make this happen.

By combining the advice contained in these pages with skill and dedication, you can reach the

pinnacle of leadership—where your influence extends beyond your immediate reach for the benefit of others. Derived from material previously published in the Wall Street Journal bestseller *The 5 Levels of Leadership*.

Mastering Leadership Apr 01 2020 Is your leadership a competitive advantage, or is it costing you? How do you know? Are you developing your leadership effectiveness at the pace of change? For most leaders today, complexity is outpacing their personal and collective development. Most leaders are in over their heads, whether they know it or not. The most successful organizations over time are the best led. While this has always been true, today escalating global complexity puts leadership effectiveness at a premium. Mastering Leadership involves developing the effectiveness of leaders—individually and collectively—and turning that leadership into a competitive advantage. The 5 Levels of Leadership Nov 20 2021 #1 New York Times bestselling author John C. Maxwell explains how true leadership works and makes it accessible to everyone. Leadership does not come from your title. In fact, being named to a position is only the first and lowest of the five levels every effective leader achieves. To become more than a boss people are required to follow, you must master the ability to inspire and build a team that produces not only results, but also future leaders. The 5 Levels of Leadership are: 1. Position—People follow because they have to. 2. Permission—People follow because they want to. 3. Production—People follow because of what you have done for the organization. 4. People Development—People follow because of what you have done for them personally. 5. Pinnacle—People follow because of who you are and what you represent. By combining the advice contained in these pages with work and a willingness to learn, anyone can rise to a higher and more effective level of leadership and thus make a greater impact.
