Tunnels and Underground Cities: Engineering and Innovation meet Archaeology, Architecture and Art. Volume 10: Strategic use of underground space for resilient cities contains the contributions presented in the eponymous Technical Session during the World Tunnel Congress 2019 (Naples, Italy, 3-9 May 2019). The use of underground space is continuing to grow, due to global urbanization, public demand for efficient transportation, and energy saving, production and distribution. The growing need for space at ground level, along with its continuous value increase and the challenges of energy saving and achieving sustainable development objectives, demand greater and better use of the underground space to ensure that it supports sustainable, resilient and more liveable cities. The contributions cover a wide range of topics, from investing in urban underground space, via effective use of underground space for sustainable cities, and the use of new energy carriers to the compound use of underground space for integrated campus-urban development. The book is a valuable reference text for tunnelling specialists, owners,

engineers, archaeologists, architects, artists and others involved in underground planning, design and building around the world, and for academics who are interested in underground constructions and geotechnics. Bernt Spiegel's *The Upper Half of the Motorcycle* was a best-selling motorcycling book in its original German with multiple editions and printings to its credit. Now translated into English, its provocative message is available to a wider audience. Spiegel's metaphor considers the rider and the motorcycle as a single unit, the rider being the upper half. Taking a multidisciplinary approach, the author draws on anthropology, psychology, biology, physics, and other disciplines to analyze the theory and function of the man-machine unit. Motorcycle riding is seen as a junction where people have created machines for personal transport and then become so adept at using them that the machine becomes like an extension of the rider themselves. The ultimate goal for riders is the integration of the man-machine interface and subsequent skill development to the point of virtuosity. Spiegel considers the various aspects of motorcycle riding that must be understood, practiced, and mastered before virtuosity can be attained. Many anecdotes, supplementary material, and in-depth treatment of specialized topics is contained in sidebars and footnotes. Numerous diagrams and photographs illustrate the book's principles allowing the reader to consider and develop their riding skill set. Haynes has discovered all the problems that motorcycle owners could possibly encounter when rebuilding or repairing their bikes. Documenting the most

common DIY fixes with hundreds of illustrations and step-by-step instructions, this compendium of repair, modification and troubleshooting advice is applicable to all domestic and import marques. Custom, Classic, Silverado For his eighth birthday, Emilio Scotto received a World Atlas. Promptly he announced his plan to make a route that would pass through all the countries of the world, a route he named BLUE ROAD ONE. When, some years later, he found himself astride a black 1100 Honda Gold Wing motorcycle, Blue Road One beckoned, and Scotto set off on a journey that would last more than a decade, take him virtually everywhere in the world, and land him in the Guinness Book of World Records. This is his story, a thrill ride that begins in his native Argentina, crosses Panama in the tumultuous time of Noriega, Mexico in the midst of an earthquake, and finds him broke in L.A. where, in a chance meeting, Muhammad Ali gives him fifty dollars and a signed book. Breaching the Iron Curtain, crossing the Berlin Wall at Checkpoint Charlie, being blessed by the Pope, set upon by cannibals in Sierra Leone, fleeing Somalia on a freighter, Scotto's adventures would be unbelievable if they weren't true. His tale of touring the world from Tunisia to Turkey, Petra to Afghanistan, Yugoslavia to Singapore, traveling miles enough to take him to the moon and back, is unlike any ever told. Come along, for the ride of a lifetime. In 1974, Honda took the wraps off a 1000cc flat four with shaft drive and water cooling, and the Honda Gold Wing was born. Renowned photographer Malcolm Birkitt has included coverage of Honda's dynamic, new Valkyrie in this update

of his best-selling Honda Gold Wing title, as well as examining all the changes in the Gold Wing since 1995. Included are intriguing early design sketches and portraits by Honda's designers and engineers. Yamaha YZF-R1 1998-2003 An essential and compelling exploration of the design, history, and culture of the motorcycle - an icon of the machine age Motorcycles are ubiquitous in the world's streets and cities, evolving over decades in engineering and design to meet individual transportation needs. With the coming demise of the internal combustion engine and the rise of electricpowered vehicles, motorcycle design is being revolutionized by new technologies, the demands of climate change, and global social transformation. The Motorcycle: Desire, Art, Design traces the exciting evolution of this automotive icon -- and the culture of desire, freedom, and rebellion that surrounds it. The 25-year history of the greatest touring motorcycle ever. Describes and illustrates Gold Wing technology and cultural phenomom. Covers the GL1100, Interstate, Aspencade, GL1200 and GL1500 versions. Taking a mechanistic approach that emphasizes the physical behavior of rubber as it slides, Analyzing Friction in the Design of Rubber Products and Their Paired Surfaces integrates the engineering and scientific evidence demonstrating that the laws of metallic friction do not apply to rubber. The book also presents a newly developed, scientifically based unified theory of rubber friction that incorporates a fourth basic rubber friction force: surface deformation hysteresis. With applications that phenomenologically treat both static and dynamic rubber

friction, the book offers practical guidance for implementing the unified theory in the analysis and design processes. The use of this theory enables comprehensive calculations of rubber friction, thereby offering opportunities to enhance public safety. While the theory applies to all elastomeric products where friction is an issue, the author primarily focuses on:

- Analyzing friction in the design of rubber tires and their contacted pavements
- The geometric design of roadways
- Motor vehicle accident reconstruction
- Analyzing slip resistance in the design of footwear and their contacted walking surfaces

Supported by extensive analytical evidence, this book details what rubber friction is and why it behaves the way it does. Describes the motorcycle sidecar, and discusses its history, sidecar types, driving skills, sidecar races and rallies, and safety precautions Haynes disassembles every subject vehicle and documents every step with thorough instructions and clear photos. The third and final installment of the JELLY BRYCE Trilogy, The Man in the Mirror follows FBI Special Agent Delf "Jelly" Bryce through the tumultuous war

years from 1941 until his death in 1974. Many things changed for Jelly during this time period, as both he and the country he loved matured while dealing with threats both from within and without. This is a story of true courage, amazing physical ability, and personal honor tempered by the inner struggles of a man driven to do the right thing in a world in which that path is not always clear. Inspired by historical events. "Ideally, I suppose every writer of history hopes someone will take their work and improve upon it. I cannot praise Mike Conti's Jelly Bryce trilogy too highly. He has breathed life into Jelly Bryce in ways my biography could not; ways in which the dry facts of newspaper articles, police reports, personnel files and even interviews of some friends and relatives have fallen short. I only wish Jelly could have read the trilogy. I believe he would have approved."-- Ron Owens Author of "Jelly Bryce, Legendary Lawman"
