This book is a survey of typical Science Fiction elements in Douglas Adams's Hitchhiker's Guide to the Galaxy. Christian Erkenbrecher first goes through a short history of Science Fiction and identifies certain motifs of the genre in order to correctly place the novel within a useful context. Classical elements of the Science Fiction canon are identified in the novel and scrutinized. It becomes clear that Douglas Adams was fully aware of the SF "burden" and we can see how its elements are used in order to create both humour and criticism. The question of whether social criticism can be applied purposefully in SF will be asked. Other big questions which are posed (and answered?) in Hitchhikers are also taken into consideration: Is there a god? Will the breakdown of communication barriers between races put an end to all wars? Can the advancement of technology prevent us from destroying ourselves? Follow the author on his way through Douglas Adams's "wholly remarkable book" and see how this exceptional hitchhiking playwright and atheist writer enriched the world with his unique prose. I met Bob Doroghazi when he dropped the first draft of his manuscript of The Physician's Guide to Investing: A Practical Approach to Building Wealth at my office. I will have to admit I was a bit skeptical: a physician writing a book on investments? During that first meeting with Bob, it became evident that he had been a successful physician and a successful investor, so I agreed to take a look at the book. I was in for a pleasant surprise. Bob's manuscript was easy to read and had specific advice useful to physicians, interspersed with lots of practical tidbits for any investor. Having written three college-level finance and investment texts, I was excited to be in on a project aimed at offering practical investment advice to a more general, yet specialized, audience. I had high expectations for the book and am pleased to say that I believe Bob has delivered a book that every physician interested in building wealth and protecting assets should read. Bob is a straight shooter; he tells it like he sees it in his book. Some doctors might be indignant on reading his statements, such as "Physicians sometimes have no idea of their limitations. This type of arrogance and ego can result in investing disaster." However, if you do have these limitations (and most professionals, even college professors, do), then reading Bob's book will help you recognize situations in which they can lead to poor investment decisions. A unique study of the link between theology and culture from a sociological perspective which addresses the issue of the pursuit of enchantment in the context of postmodernity. Sociology is applied to sociology itself to discern its own domestic response to theological readings of culture. A novel reading of Simmel, Bourdieu and Weber in relation to the Swiss Catholic theologian, Hans Urs von Balthasar, produces a controversial critique of assumptions regarding religious belief in the context of debates on secularisation and postmodernity. It took all of thirty seconds for two shots to bring the world of Margaret Tabaaha crashing down around her. After losing her husband in Afghanistan during the first year of Operation Enduring Freedom, her two sons were all she had left. Now they had been taken from her violently, deliberately, plunging her into a whiskey bottle and stripping away her reason for living. When Arthur Nakai receives a call from his first love, Margaret, her voice pleading for his help, it comes as he is attending a wake for one of the men he considered a brother from his days in the Marines 6th LAR Wolf Pack Battalion. Feeling a deep and responsible obligation to help her, Arthur soon finds himself involved in the multi-billion-dollar world of the oil and gas industry and coming face-to-face with an old adversary, Elias Dayton. Their paths had crossed when Arthur was a member of the Shadow Wolves, an elite tactical unit within US Customs and Border Protection. Now Dayton runs Patriot Security, a Blackwater-type firm that keeps the oil rigs, gas wells, and man camps secure from the Water Protectors, protesters pushing to stop the fracking and poisoning of Native lands. As Arthur works through the case from his end, Navajo police chief Jake Bilagody tackles it from another angle, looking into the strained relationship between the oil company and the Navajo people, all while searching for a missing Navajo man that may have become an unwilling piece on the reservation checkerboard. But when Arthur learns the identity of the boys' killer, he struggles to make sense of it. Because if the clues are right, he will be forced to make a decision that will haunt him for the rest of his life. Space was at the center of America's imagination in the 1960s. President John F. Kennedy's visionary statement captured the mood of the day: "We choose to go to the moon in this decade and do the other things, not because they are easy, but because they are hard." The Apollo mission's success in July 1969 made almost anything seem possible, but the Cold War made space flight the province of governmental agencies in the United States. When the Apollo program ended in 1972, space lost its hold on the public interest, as the great achievements wound down. Entrepreneurs are beginning to pick up the slack—looking for safer, more reliable, and more cost effective ways of exploring space. Entrepreneurial activity may make create a renaissance in human spaceflight. The private sector can energize the quest for space exploration and shape the race for the final frontier. Space entrepreneurs and private sector firms are making significant innovations in space travel. They have plans for future tourism in space and safer shuttles. Solomon details current US and international laws dealing with space use, settlement, and exploration, and offers policy recommendations to facilitate privatization. As private enterprise takes hold, it threatens to change the space landscape forever. Individuals are designing spacecraft, start-up companies are testing prototypes, and reservations are being taken for suborbital space flights. With for-profit enterprises carving out a new realm, it is entirely possible that space will one day be a sea of hotels and/or a repository of resources for big business. They really teach, quite plainly and lucidly, the first steps on the path of wisdom; they point out, with clear insistence, the qualities that are necessary to make these first steps fruitful; qualities without which the learner may remain, hesitating and halting, on the threshold, through lack of the force and sterling moral worth which alone make any further progress possible. "The Crest-Jewel of Wisdom begins with these first steps on the path and ends with the complete teaching of Sankara's philosophy so far as that teaching can be put into words. His teaching is, briefly stated, this: The cause of the sorrow and suffering of mankind is a belief in the reality and isolated existence of the personal life. But the personality, with the fate of which each one of us identifies himself, has no real existence; it is nothing but an image of the body in the mind, and its sufferings are imaginary. Its original cause is the "beginningless, ineffable un wisdom" of separation; and this illusion of isolated being is dispelled by an insight, which we may well call illumination, or inspiration. When the false self is dispelled, Sankara tells us, the real Self rises in the heart, as the sun shines out when the clouds are dispersed."-Charles Johnston
