This Technical Assistance Report discusses key findings of the assessment of Mali's mining and petroleum taxation. It is highlighted that the transparency of the mining or petroleum sector in Mali could be improved through the online publication of agreements signed with operating companies and their feasibility studies. The establishment of a standardized framework for the economic analysis of mining and petroleum project feasibility studies would improve governance in the natural resources sector. It is also recommended to establish the ring-fencing principle in a revised Mining Code and in the draft Petroleum Code. This five-volume set clearly manifests the great significance of these key technologies for the new economies of the new millennium. The discussions provide a wealth of practical ideas intended to foster innovation in thought and, consequently, in the further development of technology. Together, they comprise a significant and uniquely comprehensive reference source for research workers, practitioners, computer scientists, academics, students, and others on the international scene for years to come. assigned to the Inactive National Guard. The International Conference on Production Research has a good tradition: The first Conference was held in Birmingham 1971 with 61 participants. With respect to the decision that the Conference should be held every second year, by this time the Conference has been held in the following countries: Birmingham (1971, UK), Copenhagen (1973, Denmark), Amhurst (1975, USA), Tokyo (1977, Japan), Amsterdam (1979, The Netherlands), Novi Sad (1981, Yugoslavia), Windsor (1983, Canada), Stuttgart (1985, Germany), and the next Conference will take place in Cincinnati (1987, USA). The number of submitted abstracts and papers was continuously increasing such that the Programme Committee of this actual 8th Conference on Production Research has been forced to introduce a further refereeing procedure. Each submitted abstract was presented to at least two referees. This resulted not only in a reduction of the number of presented full papers and poster contributions but, as the Programme Committee and the Editors hope, it led also to a considerable increase in the scientific quality of this 8th International Conference on Production Research. The preceding conference in Windsor, Canada, was dedicated to the topic: Production Research as a Means of Productivity Improvement. We don't believe that this statement has become untrue in the meanwhile.
