***Handbook of Heating, Ventilation, and Air Conditioning May 03 2020 Over the past 20 years, energy conservation imperatives, the use of computer based design aids, and major advances in intelligent management systems for buildings have transformed the design and operation of comfort systems for buildings. The "rules of thumb" used by designers in the 1970s are no longer viable. Today, building systems engineers must have a strong analytical basis for design synthesis processes. But how can you develop this basis? Do you have on your shelf a reference that describes all the latest methods? Does it cover everything from the fundamentals to state-of-the art, intelligent systems? Does it do so in practical way that you can easily access and use when you need to? The Handbook of Heating, Ventilation, and Air Conditioning does. It combines practice and theory, systems and control, and the latest methods and technologies to provide, in one volume, all of the modern design and operation information needed by HVAC engineers. The Handbook of Heating, Ventilation, and Air Conditioning will stay up-to-date while other resources become outmoded and go through lengthy revision and reprint processes. Through a link on the CRC Web site, owners of the Handbook can access new material periodically posted by the author.***

***The Specifications of All Domestic and Foreign Motor-cars and Motor Business Wagons, 1907 Jan 03 2023 "The Specifications of All Domestic and Foreign Motor-cars and Motor Business Wagons, 1907" by The automotive business magazine Motor. Published by Good Press. Good Press publishes a wide range of titles that encompasses every genre. From well-known classics & literary fiction and non-fiction to forgotten or yet undiscovered gems of world literature, we issue the books that need to be read. Each Good Press edition has been meticulously edited and formatted to boost readability for all e-readers and devices. Our goal is to produce eBooks that are user-friendly and accessible to everyone in a high-quality digital format.***

*Komé - Kribi Dec 10 2020 This book presents the first preview of discoveries made in the longest archaeological trench ever dug in Africa. From the forests of coastal south Cameroon towards the dry savannas in southern Chad, the construction of the underground pipeline of the Chad Export Project enabled an international research team to investigate a transect of 1070 kilometers (!) length. The Kome-Kribi project demonstrates the exemplary application of rescue or preventive archaeology and of cultural heritage management with regard to a variety of involved political and commercial institutions. In areas previously almost unknown archaeologically an impressive number of 472 new sites from the Middle Stone Age to the Iron Age, many considered to be important, were located. Their description, including quantities of cultural materials, a chronological outline based on about sixty radiocarbon dates, and the integration of the new and known evidence in a synoptic consideration of the cultural development of Central Africa, provides a substantial base for further studies and, for those archaeologists less familiar with the region, also offers an introduction into the local prehistory. Finally, the authors have given us a vision on the abundance of information about Africa's past that is still preserved in the ground and scarcely touched, so far.*
