SURPLUS RECORD, is the leading independent business directory of new and used capital equipment, machine tools, machinery, and industrial equipment, listing over 95,000 industrial assets; including metalworking and fabricating machine tools, chemical and process equipment, cranes, air compressors, pumps, motors, circuit breakers, generators, transformers, turbines, and more. Over 1,100 businesses list with the SURPLUS RECORD. January 2022 issue. Vol. 99, No. 1 SURPLUS RECORD, is the leading independent business directory of new and used capital equipment, machine tools, machinery, and industrial equipment, listing over 95,000 industrial assets; including metalworking and fabricating machine tools, chemical and process equipment, cranes, air compressors, pumps, motors, circuit breakers, generators, transformers, turbines, and more. Over 1,100 businesses list with the SURPLUS RECORD. November 2022 issue. Vol. 99, No. 11 This handy reference source, is a companion volume to the author's Engineers' Guide to Pressure Equipment. Heavily illustrated, and containing a wealth of useful data, it offers inspectors,

engineers, operatives, and those maintaining engineering equipment a one stop everyday package of information. It will be particularly helpful in guiding users through the legislation that regulates this field. Legislation has very important implications for works inspection and in-service inspection of mechanical plant. An Engineers' Guide to Rotating Equipment is packed with information, technical data, figures, tables and checklists. Details of relevant technical standards, the legislation and Accepted Codes of Practice (AcoPs) published by various bodies such as HSE and SAFed, are provided in addition to a number of website addresses and contact details. COMPLETE CONTENTS: Engineering fundamentals Bending, torsion, and stress Motion and dynamics Rotating machine fundamentals: Vibration, balancing, and noise Machine elements Fluid mechanics Centrifugal pumps Compressors and turbocompressors Prime movers Draught plant Basic mechanical design Materials of construction The machinery directives Organisations and associations. Over 1,100 businesses list with the SURPLUS RECORD. June 2022 issue. Vol. 99, No. 6 Get the expert advise you need to shrink handling costs, reduce downtime and improve efficiency in plant operations! You'll use this comprehensive handbook during post design, process selection and planning, for establishing quality controls, tests, and measurements, to streamline production, and for managerial decision-making on capital investments and new automated systems. Covers principles of operation, troubleshooting, maintenance and repair of the modern braking system. Information on tool selection and usage is included, plus a chapter on brake system modifications and high-performance brake parts. This edition keeps you up-to-date with 2 revamped chapters, statutory and rule changes, and hundreds of new cases updating all 24 chapters. Revamped chapters: Chapter 8 Permanent Disability: has been updated and reorganized to present the material in a more logical way. Much of the text has been completely re-written to enhance clarity. The discussion of liens and related topics previously covered in various chapters has been revised and consolidated in Chapter 10 Liens and Medical-Legal Cost Petitions. Other new and updated material: Reforms Enacted in 2018 are summarized. §1:55 Fair Labor Standards Act: Plaintiff had valid FLSA cause of action when the plaintiff sued his employer in state court and employer's attorney planned for ICE to take him into custody at a deposition and deport him. §2:220 Exclusion for National Guard Service: Applicant was ineligible for workers' compensation benefits for psychiatric injury arising out of a sexual assault that occurred while training with the California Army National Guard. §2:59 Aggravation or Exacerbation: A second injury that causes no additional temporary or permanent disability is likely an exacerbation. §4:41 Peace Officer and Firefighter Cancer Presumption: Can defendant's failure to produce HARP documents create an adverse inference? §4:61 Anti-Attribution Clauses: Appeals Board barred defendant from rebutting industrial causation where applicant contracted a blood-borne pathogen from a prior surgical scar and diverticulitis. §4:62 MTUS: Applicant's right to challenge diagnosis or treatment with second and third opinions versus defendant's right to control treatment through utilization review. §9:60 Resubmission to UR and the 12-Month Rule: Are the worker and treating doctor bound by the 12-month rule where there has been a misunderstanding of the medical facts? §9:61.2 No Medical/Legal or Judicial Review of UR Denial: Court of Appeal cases reject arguments that the UR / IMR process is unconstitutional. §9:63 Failure to Pay TD: WCJ did not err in ordering defendant to pay 13 years of temporary disability plus penalties where defendant failed to petition for termination of temporary disability. §12:02 Safety Order Violations: Employer guilty of serious and willful misconduct for failing to utilize a "tag line" on a steel beam. §12:11 Supplemental Job Displacement Vouchers:

Applicant was not entitled to a second LC §5814 penalty for delay in providing a supplemental job displacement voucher. §12:117 Officers/Owners as Employees: LC §3352(a)(16)(A) provides an exception from the definition of an employee for certain officers and members of the board of directors of quasi-public or private corporations. §13:245 Settlement of One Part of Body Does Not Preclude Claim to Another: Applicant's claim for cumulative injury to his brain during his professional football career was not barred by a Compromise and Release Agreement settling an earlier claim of cumulative injury to other body parts. §15:50 Withdrawal Requests before Reconsideration Deadline Has Passed: Board finds no mutual mistake when defendant listed the wrong date of death which affected the amount of the death benefit payable to applicant. §15:102 Setting Aside Stipulated Awards: Board returns several cases to trial level for further hearings on whether mistake was mutual or unilateral. Board finds no good cause to set aside stipulations for unilateral mistake. §15:135 Non-attorney Representatives: Lien for fees filed by a non-attorney representative lien claimant was precluded by LC §4903(a), which does not allow fees for non-attorney representatives. §17:04 Attorney Sanctions: Sanctions for failure to appear (§17:22); inappropriate language and misrepresentations (§17:123), and failure to return the client's file (§17:131) Petition to Reduce Disability: Failure to file a timely petition to reduce permanent disability did not preclude WCJ from re-rating applicant's current level of disability with regard to petition to re-open for new and further disability. §18:116 IMR: Timeframes set forth in LC §4610.6(d) and ADR §9792.10.5(a)(1) with respect to the 45 days required for IMR to issue its decision are directory and not mandatory. §19:13 IMR: First District Court of Appeal affirms Board's decision denying the applicant's petition for the Board to order its IMR organization to disclose identities of first and second independent medical reviewers. Disqualification for Cause: Allegations of bias without sufficient detail will generally not support disqualification. §21:03 Permanent and Stationary Reports: One panel concludes that a final permanent and stationary report by the primary treating physician is not required so long as there has been an evaluation by a qualified medical evaluator addressing permanent disability. §21:06 Right to Testify: WCJ did not err in allowing applicant, who had been deported to Mexico, to testify at trial via a cell phone using the FaceTime application. §21:112 Record of Proceedings: In several cases, the Board reiterates the importance of creating a record including the identification of issues for determination to afford the parties due process. §21:190 Newly-Discovered Evidence: Board grants reconsideration based on newly discovered evidence finding that WCJ had determined the applicant's credibility based on a misleading drug testing report and the mistaken belief that the applicant was not taking his prescribed pain medications. §23:23 Number of Exhibits: 9 98284 Received document entitled: APPENDIX TO PETITION FOR WRIT Engineers rely on Groover because of the book's quantitative and engineering-oriented approach that provides more equations and numerical problem exercises. The fourth edition introduces more modern topics, including new materials, processes and systems. End of chapter problems are also thoroughly revised to make the material more relevant. Several figures have been enhanced to significantly improve the quality of artwork. All of these changes will help engineers better understand the topic and how to apply it in the field. Contains selected information from TMEH Volumes 1-5--over 1,200 pages of manufacturing information. A total of 50 chapters cover topics such as machining,

forming, materials, finishing, coating, quality control, assembly, and management. Intended for daily use by engineers, managers, consultants, and technicians, novice engineers or students. When the company was founded in a basement in the Milanese district of Quarto Oggiaro in 1963 to design and construct lubrication units, it is probable that even the engineer Guido Salvagnini didn't realize he was beginning a journey which would be as long and successful as that of the company which still bears his name. This volume does not claim to reconstruct or retell the history of Salvagnini, but is simply a series of memoirs and recollections about people who spent a long time with the company. It comprises an organized collection of memory flashes from a community of men who shared a common passion for a company that was one of a kind and who were attracted and fascinated by the figure of Ing. Guido who was for all of his co-workers a stimulus and, in his own way, a master. Vol. 99, No. 9 Introduction to Manufacturing Systems is written for all college- and university-level manufacturing, industrial technology, engineering technology, industrial design, engineering, business management and other related disciplines where there is an interest in learning about manufacturing systems as a complete system. Even lay people will find this book useful in their quest to learn more about the field. Its simple and easy-to-understand language makes it particularly useful to all readers. The field of manufacturing is a world of its own which bears on almost all other disciplines. This book is not necessarily a "how to" material that teaches one how to manufacture a product, but rather an aid to help learners gain a more complete understanding of "what is in it" and "what happens in the field". Thus, this book will provide more comprehensive information about manufacturing. It is intended to introduce every interested person to what manufacturing is, its diverse components, and the various activities and tasks that are undertaken in its many and diverse departments. It should serve as an introductory material to beginning college manufacturing and related majors. Over the years, I have learned that most of these beginners are ill equipped with key aspects of manufacturing when they arrive. This group also includes all technical- and business-minded individuals who enroll or train in trade, business, engineering, vocational and technical programs and institutions. This book is divided into 12 very distinctive chapters that are closely arranged to follow manufacturing activities as sequentially as possible, to help readers follow a rather continuous thread of activities generally undertaken in the industry. Its chapters cover various topics including different types, techniques or methods, and philosophies of manufacturing; manufacturing plants and facilities; manufacturing machines; tools and production tooling; manufacturing processes; manufacturing materials and material handling systems; measurement instruments; manufacturing personnel; manufactured products; and planning, implementing, controlling and improving manufacturing systems. industries worldwide are facing tough challenges as a consequence of the  
globalization of economy and the openness of the markets. Progress of the economic  
blocks such as the European Union, NAFTA, and MERCOSUR, and the global agreements  
such as GATT, in addition to their obvious economic and social consequences, provoke  
strong paradigm shifts in the way that the manufacturing systems are conceived and  
operate. To increase profitability and reduce the manufacturing costs, there is a  
recent tendency towards establishing partnership links among the involved  
industries, usually between big industries and the networks of components'  
suppliers. To benefit from the advances in technology, similar agreements are being  
established between industries and universities and research institutes. Such an  
open tete-cooperation network may be identified as an extended enterprise or a  
virtual enterprise. In fact, the manufacturing process is no more carried out by a  
single enterprise, rather each enterprise is just a node that adds some value (a  
step in the manufacturing chain) to the cooperation network of enterprises. The new  
trends create new scenarios and technological challenges, especially to the Small  
and Medium size Enterprises (SMEs) that clearly comprise the overwhelming majority  
of manufacturing enterprises worldwide. Under the classical scenarios, these SMEs  
would have had big difficulties to access or benefit from the state of the art  
technology, due to their limited human, financial, and material resources. The full

your way to fabricating success People have been hammering metal into shields,  
cookware, and ceremonial headdresses for centuries, and fabrication continues to be  
a popular and growing industry today. Fabricating For Dummies provides you with all  
the information you need to begin learning about metalworking, or fill any gaps in  
your existing knowledge in order to advance your career. Simply put, there's little  
out there for light reading on manufacturing. What's available is often quite  
expensive, so boring it puts you to sleep, or filled with so much technical  
gobbledygook that one's eyes glaze over within a few pages. This book offers a much-  
needed alternative, cutting through the jargon and getting right to the heart of

what you need to know to take your fab skills to fabulous new heights. Get a glimpse of the day in the life of a fab worker Discover the different alloys, shapes, and sizes of sheet metal Understand welding and joining processes Master the use of press brakes, stamping presses, and turret punches Whether you want to get your feet wet with waterjets, laser cutters, or hi-definition plasma cutters, there's something for you inside this hands-on book! Contains advice from the bench, step-by-step procedures, practice-proven strategies, and 6,000 case citations, this title is considered by many to be the number one authority on the subject. This is a complete guide to press brake operation, from basic mathematics to complex forming operations. Press Brake Technology is the most comprehensive text on press brakes to date. It brings advanced knowledge of its subject to engineering department, shop floor, and classroom. It presents information in a non-machine specific format and establishes a baseline reference, using the application of basic mathematics, trigonometry, and geometry to select die widths, establish precise bend deductions, and other aspects of press brake operation. It focuses on the machines, the procedures, the mathematics, the tools, and the safe procedures necessary to run an efficient press brake operation. Readers learn how to apply this knowledge to shop floor activities. Press Brake Technology is geared for the master craftsman as well as the novice, and is an excellent resource for engineering and drafting courses.
