Years ago, Burt Rutan told a reporter for Popular Mechanics, "If we make a courageous decision like the goal and program we kicked off for Apollo in 1961, we will see our children or grandchildren in outposts on other planets." Legendary science-fiction writer Arthur C. Clark would later recall Rutan's quote in a piece he wrote about SpaceShipOne and comment, "Fortunately, we need not rely solely on governments for expanding humanity's presence beyond the Earth." Burt Rutan's Race to Space showcases Rutan's herculean efforts to do just that. Smithsonian's Air and Space Museum displays his most celebrated achievements, including SpaceShipOne, which won the coveted \$10 million Ansari X Prize for private spaceflight; Voyager, which hangs with SpaceShipOne in the Milestones of Flight gallery; the Virgin Atlantic GlobalFlyer; and the VariEze. His many aerospace innovations preceding his most recently conceived designs, SpaceShipTwo and WhiteKnightTwo, chronicle a progressive, step-by-step attempt to break barriers with engineering know-how and a wondrous imagination, all the while remaining on the forefront of the burgeoning private spaceflight industry. Rutan's X Prize triumph and subsequent spacecraft designs are not a beginning, nor an end, but are steps in Burt Rutan's continuing adventure to expand humanity's presence beyond the Earth and into space. What is Valentine's Day?Antique

Valentine's cardAntique Valentine's cardValentine's Day (or Saint Valentine's Day) is observed on February 14 each year. Today Valentine's Day is celebrated in many countries around the world, mostly in the West, although it remains a working day in all of them. The original "St. Valentine" was just a liturgical celebration of one or more early Christian saint named Valentinus. All the modern romantic connotations were added several centuries later by poets.You can use this Blank Lined Journals (110 Pages - 6 x 9 Inch) to jot down your thoughts or class notes, write your work at home, or present it as a gift to someone you love. Railroad tracks take quite a beating, with countless tons of cold steel and freight rumbling over them day and night, wearing down rails and vibrating ties loose from their ballasts. This book reveals the special machinery railroads use to maintain and mend tracks and other property, as well as how the machines were developed and how they work. Each chapter tackles a different piece of maintenance equipment like tie pullers, spike drivers and rail grinders. Photos illustrate the machines in action, while detail shots depict the "business end" of each. This one-of-a-kind title is perfect for railfans and modelers. An illustrated history of the garden tractors that make small farms and vast gardens grow--the Cub Cadets, John Deeres, Simplicitys, Fords, Ariens, Wheel Horses, Kabotas, etc. To stay competitive and meet market expectations in a global economy, both domestic and foreign companies must realign their manufacturing processes, make improvements, and increase their manufacturing capabilities. With large numbers of employees working in a network of domestic and foreign facilities, production processes are as varied as the products being produced. Manufacturing managers need a manufacturing plan or strategy that will bring structure to this complex environment. In *Manufacturing Strategy: How to Formulate and Implement a Winning Plan*, 2nd Edition, John Miltenburg offers a sensible and systematic method to: (1) evaluate domestic and foreign factories and international manufacturing and (2) plan the appropriate manufacturing strategy to be first in the market. Incorporating comments and suggestions from managers who used the first edition of *Manufacturing Strategy*, John Miltenburg expands and improves on his focus in the areas of: International Manufacturing — where the focus is on a company's international network of factories; Competitive Strategy — where managers must understand the role manufacturing strategy plays in their company's business strategy; and Manufacturing Programs — showing how programs such as quality management, six sigma, agile manufacturing, and supply chain management fit within the manufacturing strategy. *Manufacturing Strategy* gives managers a common language for dealing with manufacturing problems at both strategic and operational levels. It improves communication

between manufacturing managers and those outside manufacturing (who will now have a better understanding of what manufacturing can and cannot do).
