The Self-Driven Child Nov 26 2019 "Instead of trusting kids with choices . . . many parents insist on micromanaging everything from homework to friendships. For these parents, Stixrud and Johnson have a simple message: Stop." —NPR "This humane, thoughtful book turns the latest brain science into valuable practical advice for parents." —Paul Tough, New York Times bestselling author of How Children Succeed A few years ago, Bill Stixrud and Ned Johnson started noticing the same problem from different angles: Even high-performing kids were coming to them acutely stressed and lacking motivation. Many complained they had no control over their lives. Some stumbled in high school or hit college and unraveled. Bill is a clinical neuropsychologist who helps kids gripped by anxiety or struggling to learn. Ned is a motivational coach who runs an elite tutoring service. Together they discovered that the best antidote to stress is to give kids more of a sense of control over their lives. But this doesn't mean giving up your authority as a parent. In this groundbreaking book they reveal how you can actively help your child to sculpt a brain that is resilient, and ready to take on new challenges. The Self-Driven Child offers a combination of cutting-edge brain science, the latest discoveries in behavioral therapy, and case studies drawn from the thousands of kids and teens Bill and Ned have helped over the years to teach you how to set your child on the real road to success. As parents, we can only drive our kids so far. At some point, they will have to take the wheel and map out their own path. But there is a lot you can do before then to help them tackle the road ahead with resilience and imagination.

**SU-76 Assault Gun** Sep 16 2021 The SU-76 assault gun was the second most widely manufactured Soviet armoured fighting vehicle of World War II, out-numbered only by the legendary T-34. Inspired in part by the German Marder series of tank destroyers, Soviet designers realized that the chassis of the obsolete T-70 light tank could be adapted to a much more substantial gun if it was placed in a fixed casemate rather than in a turret. This led to the design of the SU-76, which saw its combat debut at Kursk in the summer of 1943. The SU-76 was deployed primarily as an infantry direct support weapon, becoming the infantry tank of the Red Infantry, much as the StuG III became the infantry tank of the German infantry. Featuring full colour artwork and written by an expert on tank warfare during World War II, this fascinating study describes one of the Soviet Union's most important armoured vehicles during its struggle with Nazi Germany.

*Panzerwaffe on the Battlefield 2* Jul 03 2020 In Panzerwaffe on the Battlefield 2, Jon Feenstra looks at various German armored fighting vehicles. The captions focus on the modifications of these panzers, self-propelled guns, etc. This book covers the entire war period - from 1939 to 1945 and all theaters. This hardcover, landscape formatted book's brief introduction is followed by more than one hundred mainly unpublished photographs, published in the highest possible quality. Both the introduction and the captions are bilingual (English/Hungarian).

**Earth Day** Jun 25 2022 Earth Day celebrates our beautiful planet and calls us to act on its behalf. Some people spend the day planting flowers or trees. Others organize neighborhood clean-ups, go on nature walks, or make recycled crafts. Readers will discover how a shared holiday can have multiple traditions and be celebrated in all sorts of ways.

**21st Century Nanoscience** May 13 2021 This 21st Century Nanoscience Handbook will be the most comprehensive, up-to-date large reference work for the field of nanoscience. Handbook of Nanophysics, by the same editor, published in the fall of 2010, embraced as the first comprehensive reference to consider both fundamental and applied aspects of nanophysics. This follow-up project has been conceived as a necessary expansion and full update that considers the significant advances made in the field since 2010. It goes well beyond the physics as warranted by recent developments in the field. The fifth volume in a ten-volume set covers exotic nanostructures and quantum systems. Key Features: Provides the most comprehensive, up-to-date large reference work for the field. Chapters written by international experts in the field. Emphasises presentation and real results and applications. This handbook distinguishes itself from other works by its breadth of coverage, readability and timely topics. The intended readership is very broad, from students and instructors to engineers, physicists, chemists, biologists, biomedical researchers, industry professionals, governmental scientists, and others whose work is impacted by nanotechnology. It

will be an indispensable resource in academic, government, and industry libraries worldwide. The fields impacted by nanoscience extend from materials science and engineering to biotechnology, biomedical engineering, medicine, electrical engineering, pharmaceutical science, computer technology, aerospace engineering, mechanical engineering, food science, and beyond.

**German Self-Propelled Artillery Guns of the Second World War** Jan 01 2023 • One of the few books that explores the design and deployment of German artillery self-propelled guns (SPGs) to support tanks and infantry during the Second World War • A great reference book for military modellers, historians and tank wargamers interested in German SPGs • A comprehensive guide to German SPGs between 1939 and 1945 in one volume for the very first time, including previously unpublished information on the little-known Hummel-Wespe proving that at least twelve units were built • Authentic camouflage suggestions for military modellers A single towed artillery gun required a team of six horses and nine men. During the Second World War, German engineers mounted an artillery gun on top of a tank chassis; this new technology reduced the amount of valuable war resources as self-propelled guns only required a four- or five-man crew. They could also be made ready to fire more rapidly. German Self-Propelled Artillery Guns of the Second World War covers the development and use of this new weapon between 1939 and 1945. One type was successfully deployed in the invasion of France in 1940 and more were used on the Eastern Front against Soviet forces from 1941 until the end of the war. The 'Desert Fox' (Ewin Rommel) demanded artillery guns that could keep up with his panzers in North Africa. He was sent 15-cm howitzers mounted on top of Panzer II tank chassis' and captured French Army Lorraine 37L-tracked armoured supply vehicles. Rommel's forces in northern France were equipped with a variety of new self-propelled guns, which were used against the Allies on the beaches of Normandy during D-Day in 1944. • Includes 81 colour photographs

**The Self-Propelled Advantage** Oct 30 2022 Joanne Calderwood has been a popular magazine columnist for several years and has become a very popular speaker at home-education conferences across the country. Her self-propelled philosophy of education has transformed lives across the nation and the world. She is considered a "Mom Magnet" due to her down-to-earth persona and ability to speak to the real issues of parenting in the twenty-first century. "The Self-Propelled Advantage" is a complete synopsis of her wisdom, experience, and philosophy of education and parenting, as borne out in the lives of her own exceptional children. This book will be extremely popular with anyone who currently places a high value on the education of their children. "The Self-Propelled Advantage" also contains valuable information on preparing for college entrance exams like the SAT and ACT. With one SAT perfect scorer, one near-perfect scorer, and four students who have gone to college on full academic scholarships, she has the results to provide provenance to her work.

**Small Engines and Outdoor Power Equipment** May 01 2020 This new book is more than a simple engine repair manual. Designed for the beginner with little or no mechanical experience, Small Engines & Outdoor Power Equipment is a graphically appealing, step-by-step guide that covers all of the most important engine maintenance and repair skills you'll need to keep your equipment running at peak performance. It also shows exactly how to perform mechanical upkeep and repairs on the most common outdoor power implements, including lawn mowers, snow blowers, chain saws, power washers, generators, leaf blowers, rototillers, wood splitters, lawn edgers, and weed whips. With clear 'how-to' photos and detailed diagrams, you'll see exactly what needs to be done. A comprehensive troubleshooting guide helps you define problems and enact solutions. With Small Engines & Outdoor Power Equipment in your library, you won't need to haul the lawn mower off to the repair center and wait a few weeks just because a filter is plugged or the old gas needs to be replaced. Among the many skills you'll learn are seasonal tune-ups, changing oil, servicing spark plugs, cleaning filters, replacing muffler, servicing the fuel tank, overhauling the carburetor, servicing brakes, inspecting flywheels, replacing the fuel pump, and replacing a rewind cord.

**21 Panzer Division** Aug 23 2019 In February 1941, the German High Command decided to dispatch an expeditionary force to north Africa in support of the Italian forces which were in a difficult situation against the British. This contingent included elements that a few months later were to form the 5th Light Division, and in 1942, the 21st Panzer-Division. As the keystone of the Deutsches Afrika Korps, this division was involved in the hardest battles in that theater of operations until it was finally driven out of the continent of Africa along with the rest of the Axis forces in May 1943. A new division was then formed in France from the surviving elements. Poorly equipped, partly with old models of French and German tanks, the division showed great initiative in turning these salvaged vehicles into formidable fighting weapons. On 6 June 1944, 21st Panzer-Division was the first German armored formation to be launched in a counter-attack against the Allied landings in Normandy. After getting as far as the coast, the division was forced back. However its action on D-Day held up British troops' attempts to capture the city of Caen for a whole month. It was almost wiped out in the British offensive west of Caen on 18 July 1944, but fought on in the hedgerows before retiring eastwards across France. Following the failed German counter-attack in Alsace in 1945, the division was transferred to the eastern front where it was annihilated in the Halbe pocket shortly before the end of the war.
