An application of differential forms for the study of some local and global aspects of the differential geometry of surfaces. Differential forms are introduced in a simple way that will make them attractive to "users" of mathematics. A brief and elementary introduction to differentiable manifolds is given so that the main theorem, namely Stokes' theorem, can be presented in its natural setting. The applications consist in developing the method of moving frames expounded by E. Cartan to study the local differential geometry of immersed surfaces in R^3 as well as the intrinsic geometry of surfaces. This is then collated in the last chapter to present Chern's proof of the Gauss-Bonnet theorem for compact surfaces.

Becoming lean and fit is not a matter of training for a few weeks, like Rocky, to become a world champion. That only happens in Hollywood movies that portray professional athletes exercising for hours every day until they are exhausted. Real athletes never do that. They train only to the point that they can recover for the next day's training. Their progress comes in small increments, not heroic triumphs.

Unfortunately, movies have persuaded people that they can become lean and fit virtually overnight. Even the weight loss and fitness industry bought into this distortion and began pushing people to become like Rocky. When that approach failed, because people were injuring themselves or burning out or jumping from one program to another, trainers began to entertain their clients instead of finding solutions to their problems. If you want to become truly lean and fit, you must work at it like an athlete, following a structured routine and that is easier and more pleasant than you may expect. The principles

that work for athletes also work for ordinary people of all ages. Athletes, of course, have coaches. The Happy Body program, on the other hand, will teach you everything you need to know to be your own coach. This innovative program establishes, for the first time, exact scientific and testable methods and goals to engineer your own weight loss and fitness within precise time periods. That empowers you to self-correct your progress at every step. The Happy Body is a total health program, not just an exercise or diet plan. It will teach you to safely lose 1.0 to 2.5 pounds every week, and keep them off, without getting stuck at plateaus. You will have full control over the process, right down to the ounce. In addition to teaching you how to lose weight, the program will also help you to restore the flexibility and posture you had as a young child, and to be leaner, stronger, and faster than you have ever been. In essence, The Happy Body program will not only make you as youthful as you were at twenty, but twenty as

you would have been if you had followed the program at that age. NOTE: The exam this book covered, CompTIA A+ (Exams 220-901 and 220-902), was retired by CompTIA in 2019 and is no longer offered. A journey from Burning Man to the Akashic Field that suggest how 5-MeO-DMT triggers the human capacity for higher knowledge through direct contact with the zero-point field • Examines

Bufo alvarius toad venom, which contains the potent natural psychedelic 5-MeO-DMT, and explores its entheogenic use • Proposes a new connection between the findings of modern physics and the knowledge held by shamans and religious sages for millennia The venom from Bufo alvarius, an unusual toad found in the Sonoran desert, contains 5-MeO-DMT, a potent natural chemical similar in effect to the more common entheogen DMT. The venom can be dried into a powder, which some researchers speculate was used ceremonially by Amerindian shamans. When smoked it prompts an instantaneous break with the physical world that causes out-of-body experiences completely removed from the conventional dimensions of reality. In Tryptamine Palace, James Oroc shares his personal experiences with 5-MeODMT, which led to a complete transformation of his understanding of himself and of the very fabric of reality. Driven to comprehend the transformational properties of this substance,

Oroc combined extensive studies of physics and philosophy with the epiphanies he gained from his time at Burning Man. He discovered that ingesting tryptamines unlocked a fundamental human capacity for higher knowledge through direct contact with the zero-point field of modern physics, known to the ancients as the Akashic Field. In the quantum world of nonlocal interactions, the line between the physical and the mental dissolves. 5-MeO-DMT, Oroc argues, can act as a means to awaken the remarkable capacities of the human soul as well as restore experiential mystical spirituality to Western civilization. A counterintelligence expert shows readers how to use trust to achieve anything in business and in life. Robin Dreeke is a 28-year veteran of federal service, including the United States Naval Academy, United States Marine Corps. He served most recently as a senior agent in the FBI, with 20 years of

experience. He was, until recently, the head of the Counterintelligence Behavioral Analysis Program, where his primary mission was to thwart the efforts of foreign spies, and to recruit American spies. His core approach in this mission was to inspire reasonable, well-founded trust among people who could provide valuable information. The Code of Trust is based on the system Dreeke devised, tested, and implemented during years of field work at the highest levels of national security. Applying his system first to himself, he rose up through federal law enforcement, and then taught his system to law enforcement and military officials throughout the country, and later to private sector clients. The Code of Trust has since elevated executives to leadership, and changed the culture of entire companies, making them happier and more productive, as morale soared. Inspiring trust is not a trick, nor is it an arcane art. It's an important, character-building endeavor that requires only a sincere desire to be helpful and

sensitive, and the ambition to be more successful at work and at home. The Code of Trust is based on 5 simple principles: 1) Suspend Your Ego 2) Be Nonjudgmental 3) Honor Reason 4) Validate Others 5) Be Generous To be

successful with this system, a reader needs only the willingness to spend eight to ten hours learning a method of trust-building that took Robin Dreeke almost a lifetime to create.
