Measuring Literacy Dec 10 2020 The National Assessment of Adult Literacy (NAAL) is a household survey conducted periodically by the Department of Education that evaluates the literacy skills of a sample of adults in the United States ages 16 and older. NAAL results are used to characterize adults' literacy skills and to inform policy and programmatic decisions. The Committee on Performance Levels for Adult Literacy was convened at the Department's request for assistance in determining a means for booking assessment results that would be useful and understandable for NAAL's many varied audiences. Through a process detailed in the book, the committee determined that five performance level categories should be used to characterize adults' literacy skills: nonliterate in English, below basic literacy, basic literacy, intermediate literacy, and advanced literacy. This book documents the process the committee used to determine these performance categories, estimates the percentages of adults whose literacy skills fall into each category, recommends ways to communicate about adults' literacy skills based on NAAL, and makes suggestions for ways to improve future assessments of adult literacy.

Assessing Mathematical Literacy Aug 25 2019 This book describes the design, development, delivery and impact of the mathematics assessment for the OECD Programme for International Student Assessment (PISA). First, the origins of PISA's concept of mathematical literacy are discussed, highlighting the underlying themes of mathematics as preparation for life after school and mathematical modelling of the real world, and clarifying PISA's position within this part of the mathematics education territory. The PISA mathematics framework is introduced as a significant milestone in the development and dissemination of these ideas. The underlying mathematical competencies on which mathematical literacy so strongly depends are described, along with a scheme to use them in item creation and analysis. The development and implementation of the PISA survey and the consequences for the outcomes are thoroughly discussed. Different kinds of items for both paper-based and computer-based PISA surveys are exemplified by many publicly released items along with details of scoring. The novel survey of the opportunity students have had to learn the mathematics promoted through PISA is explained. The book concludes by surveying international impact. It presents viewpoints of mathematics educators on how PISA and its constituent ideas and methods have influenced teaching and learning practices, curriculum arrangements, assessment practices, and the educational debate more generally in fourteen countries.

Multiple Paths to Literacy Nov 28 2019 Founded on the premise that education, especially literacy, should be accessible to all students in a democratic society; the seventh edition of "Multiple Paths to Literacy: Assessment and Differentiated Instruction for Diverse Learners, K-12 (with MyEducationLab)" is written to help teachers address the literacy needs of the diverse learners that populate today's K-12 classrooms. To meet every student's literacy needs, teachers must learn to differentiate classroom instruction. According to Joan Gipe, differentiating instruction requires knowing where students are in their literacy development and using multiple forms of literacy to meet those needs - including text-based materials, technology, visual literacy, and the performing arts. "Multiple Paths to Literacy" provides teachers with an analytical approach and practical strategies to "recognize learners' literacy strengths and needs," "identify any students with special needs," and "plan and differentiate instruction that takes into account each student's talents and multiple intelligences" to tailor that instruction. See what's new to this edition: New chapter (7) on early literacy. Explicit connections between literacy instruction and the democratic values of teaching demonstrate how to value the uniqueness of students to meet their individual literacy needs. Updated coverage of reading comprehension--the heart of reading--in each of the five chapters that address comprehension. Clarification of analytic teaching versus differentiating instruction. Everyday Advocacy: Teachers Who Change the Literacy Narrative Oct 27 2019 What counts as professionalism for teachers today? Once, teachers who knew their content area and knew how to teach it were respected as professionals. Now there is an additional type of competency required: in addition to content and pedagogical knowledge, educators need advocacy skills. In this groundbreaking collection, literacy educators describe how they are redefining what it means to be a teaching professional. Teachers share how they are trying to change the conversation surrounding literacy and literacy instruction by explaining to colleagues, administrators, parents, and community members why they teach in particular research-based ways, so often contradicted by mandated curricula and standardized assessments. Teacher educators also share how they are introducing an advocacy approach to preservice and practicing teachers, helping prepare teachers for this new professionalism. Both groups practice what the authors call “everyday advocacy”: the day-to-day actions teachers are taking to change the public narrative surrounding schools, teachers, and learning.
