The treatment of the nude in American art. This study of American travel to Mexico from 1884 to 1911 examines how the influx of tourists and speculators altered perceptions of US influence. When railroads connected the United States and Mexico in 1884, travel between the two countries became easier and cheaper. Americans developed an intense curiosity about Mexico, its people, and its opportunities for business and pleasure. Indeed, so many Americans visited Mexico during the Porfiriato—the long dictatorship of Porfirio Díaz—that observers on both sides of the border called it a “foreign invasion.” This, as Jason Ruiz demonstrates, was an especially apt phrase. In *Americans in the Treasure House*, Ruiz argues that this influx of travelers helped shape American perceptions of Mexico as a logical place to exert its cultural and economic influence. Analyzing a wealth of evidence ranging from travelogues and literary representations to picture postcards and snapshots, Ruiz shows how American travelers constructed an image of Mexico as a nation requiring foreign intervention to reach its full potential. Most importantly, he relates the rapid rise in travel and travel discourse to complex questions about national identity, state power, and economic relations across the US-Mexico border. *Acts of Media* seeks to consolidate a field of multidisciplinary work around media technologies that intersects with legal scholarship. This volume brings together contributions from leading academics, lawyers, researchers and policy experts about contemporary India and Sri Lanka. The approaches to law and media taken in this volume challenge us to think outside of traditional disciplinary descriptions. Rather than approaching the law as being outside of, and constantly catching up with the media, the contributors of this book view law and media as being deeply intertwined. The chapters in this volume address the relationship between law and media through different entry points—disputes over media and information systems shaping law, theories of law that incorporate media forms, and law and media co-producing trials. The multidisciplinary nature of this book has facilitated a rich and productive conversation among legal scholars, researchers and lawyers from disciplines such as constitutional law, law and technology, media and cinema studies, legal anthropology and political science. The noted photographer Joseph Dixon followed his inaugural 1908 expedition to Montana with a second journey in 1909 for a meeting of “what was expected to be the Last Great Indian Council.” Dixon and his partner, financier Rodman Wannamaker, “believed, like so many of their contemporaries, that the traditional American Indian was destined to disappear... It was time to gather the last generation to tell their stories

for Dixon’s book, *The Vanishing Race*... Representatives from nearly every reservation were assembled. Rooted in the creative success of over 30 years of supermarket tabloid publishing, the *Weekly World News* has been the world's only reliable news source since 1979. The online hub [www.weeklyworldnews.com](http://www.weeklyworldnews.com) is a leading entertainment news site. *Deep Fakes: Algorithms and Society* focuses on the use of artificial intelligence technologies to produce fictitious photorealistic audiovisual clips that are indistinguishable from traditional video media. For over a century, the indexical relationship of the photographic image, and its related media of film and video, to the scene of capture has served as a basis for truth claims. Historically, the iconicity of these images has featured a causal traceback to actual light rays in a particular time and space, which were fixed by chemical reactions or digital sensors to the resultant image. Today, photorealistic audiovisual media can be generated from deep learning networks which sever any connection to an actual event. Should society instantiate new regimes to manage this new challenge to our sense of reality and the traditional evidential capacities of the ‘mechanical image?’ How do these images generate information disorder while also providing the basis for legitimate tools used in entertainment and creative industries? Scholars and students from many backgrounds, as well as policy makers, journalists and the general reading public will find a multidisciplinary approach to questions posed by deep fake research from Communication, International Studies, Writing and Rhetoric. This collection of Delaware legends has long been out of print. Originally published in 1905, this collection of authentic Delaware legends has long been sought both by scholars and individuals who cherish the lessons these tales impart. Stories such as “The Hunter and the Owl” teach us the importance of keeping a promise. The legend “A-le-pah-qua, The Woman with the Two Plants” demonstrates how we should not abuse the powers we are given. This book does much more than introduce the richness of the original Delaware language to an English-speaking audience: Four of these legends have been retranslated into the Delaware language by native Delaware speakers. Readers will find line-by-line translations that reveal the eventual transformation of a transliterated Delaware text into an English-language story. Michel Strauss embarked on an enduring love affair at the age of six when he saw for the first time paintings by Manet, Monet and Degas: the passion aroused by these artists never left him. This passion, this ‘eye’ as he calls it led to his becoming Head of the Impressionist Department at Sotheby’s where he remained for forty years. He describes the personalities he met along the way: the collectors, the dealers, the colleagues and even the forgers, as well as the clients who shared his passion. There were times of boom and times of recession, there were very difficult times -in particular the anti-trust era -and there were times that brought great delight and a sense of achievement, in particular the British Rail Pension Fund sale which Michel had helped set up and which exceeded all expectations. An authoritative and highly respected figure in the art world, Michel Strauss has handled the greatest of all Impressionist works, some of which it was thought had been lost forever. In 1925, Beatrice Blackwood of the University of Oxford's Pitt Rivers Museum took thirty-three photographs of Kainai people on the Blood Indian Reserve in Alberta as part of an anthropological project. In 2001, staff from the museum took copies of these photographs back to the Kainai and worked with community members to try to gain a better understanding of Kainai perspectives on the images. ‘*Pictures Bring Us Messages*’ is about that process, about why museum professionals and archivists must work with such communities, and about some of the considerations that need to be addressed when doing so. Exploring the meanings that historic photographs have for source communities, Alison K. Brown, Laura Peers, and members of the Kainai Nation develop and demonstrate culturally appropriate ways of researching, curating, archiving, accessing, and otherwise using museum and archival collections. They describe the process of relationship building that has been crucial to the research and the current and future benefits of this new relationship. While based in Canada, the dynamics of the ‘*Pictures Bring Us Messages*’ project is relevant to indigenous peoples and heritage institutions around the world. The American Indians have lost much of their land over the years, but their legacy is evident in the many places around the United States that have Indian names. Countless placenames have, however, been corrupted over time, and numerous

placenames have similar spellings but different meanings. This reference work is a reprint in one combined volume of the two-volume set published by McFarland in 2003 and 2005. Volume One covers the name origins and histories of cities, towns and villages in the United States that have Indian names. It is arranged alphabetically by state, then alphabetically by city, town or village name. Additional data include population figures and county names. Probable Indian placenames with no certain origin also receive entries, and as much history as possible is provided about those locations. Volume Two covers more than 1400 rivers, lakes, mountains and other natural features in the United States with Indian names. It is arranged by state, and then alphabetically by natural feature. Counties are provided for most entries, with multiple counties listed for some entries where appropriate. In addition to name origins and meanings, geophysical data such as the heights of mountains and lengths of waterways are indicated. History, old-style wool blankets, changes brought about by traders, symbolism of design and color, a Navajo weaver at work, more. Emphasis on Navajo. Includes information on the Bayeta blanket, squaw dresses, dyeing, belts, garters, hair braids, imitation blankets, the Chimayó blanket, and reliable dealers. 254 illustrations, 32 in color. Insightful introduction and analysis of Navajo Talking Picture. American International Pictures was in many ways the "missing link" between big-budget Hollywood studios, "poverty-row" B-movie factories and low-rent exploitation movie distributors. AIP first targeted teen audiences with science fiction, horror and fantasy, but soon grew to encompass many genres and demographics--at times, it was indistinguishable from many of the "major" studios. From Abby to Zontar, this filmography lists more than 800 feature films, television series and TV specials by AIP and its partners and subsidiaries. Special attention is given to American International Television (the TV arm of AIP) and an appendix lists the complete AITV catalog. The author also discusses films produced by founders James H. Nicholson and Samuel Z. Arkoff after they left the company. This work is essential for anyone doing research in rock art and petroglyphs. Col. Garrick Mallery's report on the picture-writing of the American Indians is one of the most significant of all the early reports of the Bureau of Ethnology of the Smithsonian Institution. Besides a special section on petroglyphs, most of the specimens are roughly contemporary with the report's writing and were collected by ethnologists, explorers, and expeditions to reservations. The focus is on the significance of the pictures and the dissimilarities between the styles of picture-writing of the various tribes. Col. Mallery's report is the fundamental study of North American Indian picture-writing for anthropologists, sociologists, historians, or artists. Since most of the samples were collected by peers while picturing was still a vital method of communication, the ethnologists were often helped by the Indians themselves in interpreting the pictographs and uncovering the wealth of information they conveyed. The report consists of almost 1,300 pictures and 54 plates illustrating the samples which Col. Mallery describes. The essential road map for understanding—and defending—your right to privacy in the twenty-first century. Privacy is disappearing. From our sex lives to our workout routines, the details of our lives once relegated to pen and paper have joined the slipstream of new technology. As a MacArthur fellow and distinguished professor of law at the University of Virginia, acclaimed civil rights advocate Danielle Citron has spent decades working with lawmakers and stakeholders across the globe to protect what she calls intimate privacy—encompassing our bodies, health, gender, and relationships. When intimate privacy becomes data, corporations know exactly when to flash that ad for a new drug or pregnancy test. Social and political forces know how to manipulate what you think and who you trust, leveraging sensitive secrets and deepfake videos to ruin or silence opponents. And as new technologies invite new violations, people have power over one another like never before, from revenge porn to blackmail, attaching life-altering risks to growing up, dating online, or falling in love. A masterful new look at privacy in the twenty-first century, *The Fight for Privacy* takes the focus off Silicon Valley moguls to investigate the price we pay as technology migrates deeper into every aspect of our lives: entering our bedrooms and our bathrooms and our midnight texts; our relationships with friends, family, lovers, and kids; and even our relationship with ourselves. Drawing on in-depth interviews with victims, activists, and advocates, Citron brings this headline issue home for readers by weaving together visceral stories about the countless ways that corporate and individual violators exploit privacy loopholes. Exploring why the law has struggled to keep up, she reveals how our current system leaves victims—particularly women, LGBTQ+ people, and marginalized groups—shamed and powerless while perpetrators profit, warping cultural norms around the world. Yet there

is a solution to our toxic relationship with technology and privacy: fighting for intimate privacy as a civil right. Collectively, Citron argues, citizens, lawmakers, and corporations have the power to create a new reality where privacy is valued and people are protected as they embrace what technology offers. Introducing readers to the trailblazing work of advocates today, Citron urges readers to join the fight. Your intimate life shouldn't be traded for profit or wielded against you for power: it belongs to you. With Citron as our guide, we can take back control of our data and build a better future for the next, ever more digital, generation. John Easy searches California for a screenwriter's daughter who's back from the dead In 1972, Los Angeles is the wacko capital of the world. Gurus, junkies, and wannabe actresses all wind up here, and when one goes missing, John Easy is there to investigate. A hip private eye with a battered VW and a major turtleneck collection, he's pondering an encroaching wildfire when his secretary tells him that Frederic McCleary's daughter has risen from the dead. Five years ago, Jackie McCleary took a dive into the Pacific Ocean, leaving her old man nothing but a suicide note and his Academy Awards to keep him company. Her body was never found, and her father has long nursed a secret hope that she is still alive. Out of the blue, he receives a letter in Jackie's handwriting asking for a meeting. When she doesn't show, he hires John Easy to find his daughter in a city whose citizens all too often resemble the living dead. In this lavishly illustrated book, David Morgan surveys the visual culture that shaped American Protestantism in the nineteenth and twentieth centuries--a vast record of images in illustrated bibles, Christian almanacs, children's literature, popular religious books, charts, broadsides, Sunday school cards, illuminated devotional items, tracts, chromos, and engravings. His purpose is to explain the rise of these images, their appearance and subject matter, how they were understood by believers, the uses to which they were put, and what their relation was to technological innovations, commerce, and the cultural politics of Protestantism. His overarching argument is that the role of images in American Protestantism greatly expanded and developed during this period. A "eye-opening, gritty, and compelling" memoir by one of New York City's last Times Square peep show girls (The Paris Review Online). In 2006, Gotham City Video was among the last of its kind where, breathing in a cocktail of Pine-Sol and Windex, a man paid \$40 to watch a girl strip naked behind glass. These fantasy lands, left over from the days when 42nd Street was the center of vice, eventually disappeared from the rapidly gentrifying city, their stories lost forever. Not those of tenderloin grinder, Sheila McCelar. Pulling back the curtain on the little-documented world of the peeps, her "ribald . . . memorable and highly relevant" (The Daily Beast) reflection is "both a eulogy and a paean to the freaks and misfits who have long given their souls to the city" (Matthew Gallaway, author of *The Metropolis Case*). A late bloomer from small-town Michigan, Sheila arrived in New York as a struggling actress and soon found herself adrift. Borderline homeless, and crashing with friends, she finally got steady work that paid the rent—as a stripper along the triple-x stretch of Eighth Avenue. When Times Square seeped into her blood, she ended up staying much longer than she imagined. The story she tells is not just of her own coming-of-age, it's a "sharp, sweetly personal . . . fascinating and honest" narrative of modern life on the fringes of society in New York City (Mark Jacobson, author of *Pale Horse Rider*). "All of the 90 pieces selected from more than 350 works in the collection are presented here in full color, each accompanied by a brief discussion of the artist and his or her work by leading scholars in the field as well as authorities on the collection. The essays examine the works of sculptors represented in the Sheldon's collection, including Barlach, Brancusi, Calder, Duchamp, Moore, and Rodin, and present a concise yet comprehensive overview of pertinent scholarship that will be of value to both students and experts in the field."--BOOK JACKET. White Face by Paul V. Quinn In Paul V. Quinn's *White Face*, James Russell was known throughout the entire American West for his heroism. He has fought off men twice his size in the name of justice. However, he wasn't always this way. In this thrilling tale of a nomad seeking adventure in the American West, James Russell becomes "White Face." This Book Is Primarily On The Indian Situation In The Context Of Feminism With Special Reference To The Status Of Indian Women Through The Ages And The External Influences That Transform Their Life Style In Modern India.
